

Dr. Greg Rubin DDS Announces the Opening of Comprehensive Dental Care Center in Thousand Oaks, CA

State-of-the-Art Facility to Offer Advanced Treatments Including Dental Implants, Smile Makeovers, and Innovative 'Teeth-in-One-Day' Service for Enhanced Patient Care

Thousand Oaks, California May 23, 2024 ([IssueWire.com](https://www.issuewire.com)) - Dr. Greg Rubin, DDS, a seasoned dental professional with 40 years of experience, is proud to announce the grand opening of his new state-of-the-art Dental Care Center in Thousand Oaks, California. Having treated tens of thousands of patients over his distinguished career, Dr. Rubin is bringing his expertise and his team of dental specialists to a new facility dedicated to transforming smiles and enhancing oral health.

The new center is equipped with cutting-edge technology, including the ITERO® 3D intraoral scanner for precise Invisalign clear aligner treatments and Digital CT SCAN x-ray equipment that offers ultra-low radiation to ensure patient safety. Additionally, the latest 3D printers enable the on-site production of crowns, bridges, and dentures, significantly reducing wait times and enhancing patient convenience. Patients in the Southern California area will have access to experienced team, advanced dental implant procedures, including full arch dental implants.

"We are one of the very few dental offices in the area that provide 'Teeth-in-One-Day' treatment," said Dr. Rubin. "This innovative service allows patients to receive dental implants and new teeth in a single visit, providing immediate results and improving their quality of life." According to the American College of Prosthodontists, 120 million Americans are missing at least one tooth, and 36 million have no teeth. This is known as partial edentulism and edentulism, respectively. These numbers are expected to increase in the next two decades, with some estimates predicting that more than 200 million Americans will have partial tooth loss in 15 years.

Dr. Rubin's new center reflects his commitment to integrating the latest advancements in dental technology and patient care. By leveraging these advanced tools, the practice offers comprehensive dental services that include:

- Dental Implants: Utilizing state-of-the-art technology for durable and natural-looking results.
- Smile Makeovers: Customizing treatments like cosmetic veneers and teeth whitening to enhance the appearance of your smile.
- Halitosis (Bad Breath) Treatments: Providing expert care to address and treat chronic bad breath.
- TMJ Treatments: Offering solutions for jaw pain and related issues.
- Sports Mouthguards: Custom-fitted for maximum protection during sports activities.
- Preventive Care: Ensuring long-term oral health through regular check-ups and cleanings.
- Restorative Treatments: Including fillings, crowns, and bridges to repair and restore damaged teeth.
- Advanced Cosmetic Procedures: Tailored to achieve beautiful, confident smiles.
