

GDG & ABAN Power Forge Strategic Partnership to Propel Offshore Wind and Energy Infrastructure in India and Asia-Pacific

Chennai, Tamil Nadu May 22, 2024 ([Issuewire.com](https://www.issuewire.com)) - Gavin and Doherty Geosolutions (GDG), a subsidiary of the Ventera Group, and ABAN Power are thrilled to announce a groundbreaking strategic partnership aimed at accelerating the development and implementation of offshore wind projects, marine and offshore structures, and related initiatives in India and the Asia-Pacific region. This landmark collaboration underscores a mutual dedication to advancing clean energy solutions and broadening service offerings, particularly within the rapidly expanding offshore wind sector in India and beyond.

This strategic alliance leverages the comprehensive expertise and extensive resources of both GDG and ABAN Power, supporting India's ambitious target of achieving 500 GW of renewable energy capacity by 2030. The partnership offers a unique opportunity for these industry leaders to introduce world-class expertise and innovative solutions to India's burgeoning renewable energy sector.

Dr. Indrasenan Thusyanthan, Managing Director of GDG, remarked, "Over a year ago, I identified clear priorities to expand GDG's presence in India and the Asia-Pacific region. Our partnership with a leading company like ABAN Power perfectly aligns with our strategic vision. This collaboration allows us to combine our extensive experience and bring unmatched expertise to support India's ambitious clean energy goals."

Srijith Menon, Head of Green Business at ABAN Power Limited, added, "We are excited to join

forces with GDG and leverage our extensive experience in offshore and renewable energy projects globally. Our partnership is uniquely positioned to lead the offshore sector in India, significantly contributing to the country's renewable energy targets. Today's announcement highlights ABAN's commitment to climate action and delivering renewable energy solutions to customers across India."

The GDG and ABAN Power partnership will offer an extensive range of essential services, grounded in geoscience-based innovation and industry-leading engineering. This alliance merges two highly complementary service portfolios from trusted industry brands, enhancing their ability to meet the diverse needs of the evolving offshore energy and infrastructure market.
