

Internet 2.0 Conference To Discuss AI-Driven Scam Offenses In Its 2025 Edition

The conference will spotlight critical tech issues, including AI-driven scam offenses, showcasing a diverse agenda of pressing topics.

The logo for the Internet 2.0 Conference is centered on a large red rectangular background. The word "internet" is written in a lowercase, white, sans-serif font. Above the letter 'e' in "internet" are three white curved lines representing a Wi-Fi signal. To the right of "internet" is a white square containing the number "2.0" in a bold, white, sans-serif font. Below the word "internet" and the "2.0" square, the word "Conference" is written in a smaller, white, sans-serif font.

Las Vegas, Nevada May 27, 2024 ([IssueWire.com](https://www.issuewire.com)) - Scheduled for March 4–6, 2025, at the Luxor Hotel & Casino in Las Vegas, USA, the [Internet 2.0 Conference](#) is set to explore trends and practices in the tech landscape, with a particular focus on the implications of AI-driven scam offenses. This conference, an anticipated name amongst IT conferences in Vegas, serves as a crucial platform for

discussing the transformative and challenging aspects of modern technology, aiming to address emerging threats in the digital domain.

The Internet 2.0 Conference, known for its promoting discussions on cutting-edge technology, offers attendees a glimpse into the expansive tech landscape and the emerging trends and scopes in its diverse three-day agenda. This year's sessions will include topics like *"Disaster Recovery In The Cloud: Ensuring Business Continuity," "Tech For Good: How Startups Are Driving Positive Social Change,"* and *"Skills-First Hiring In The Era Of AI."* The upcoming edition will build on diversity and innovation, broadening its focus to include vital discussions on fraud, scams, and spam in the tech sector.

AI-driven scam offenses, particularly phishing and email fraud, represent a growing concern in the digital landscape. These scam offenses leverage sophisticated artificial intelligence techniques to mimic legitimate entities and deceive individuals into disclosing personal information or transferring funds. The Internet 2.0 Conference will tackle this pressing issue by offering insightful discussions and presentations focused on the latest strategies to detect and mitigate the impacts of these AI-driven threats.

"We are committed to shedding light on the complex dynamics of AI-driven scam offenses. The Internet 2.0 Conference aims to equip attendees with robust strategies to anticipate and combat these digital threats, thereby enhancing the overall security landscape," said Kashif Ansari, Manager at the Internet 2.0 Conference.

Furthermore, the attendees of the Internet 2.0 Conference will also benefit from its curated networking opportunities, recognition of industry pioneers, and extensive exhibit spaces. These elements are designed to encourage collaboration and innovation among professionals while also highlighting significant contributions to the tech field.

About Internet 2.0 Conference

Internet 2.0 Conference gathers tech professionals to discuss and share insights on the evolving landscape of technology. The conference provides a critical platform for exploring a variety of topics that shape our digital world, ensuring a forward-thinking dialogue among leaders and innovators.
