

Introduactable Launch: The Rise of Warm Introductions For Business

Trusted Third Party To Arrange Meetings

Raleigh, North Carolina May 13, 2024 ([IssueWire.com](https://www.IssueWire.com)) - Introduactable, a revolutionary AI-powered networking platform designed to foster meaningful business meetings and connections, officially launches today, May 13, offering organizations a revolutionary new way to connect and collaborate.

"In today's era of mass outreach and digital noise, genuine human connections are more vital yet more elusive than ever," said Jeff Buechler, CEO and co-founder of Introduactable. "Introduactable is the antidote - a platform that revolutionizes the sales process through trusted introductions facilitated by existing relationships. When the right people are brought together, the opportunities for meaningful collaboration are limitless."

Introduactable delivers:

- **Relationship-Driven Networking:** By leveraging warm introductions facilitated through a trusted third party, Introduactable users establish trust and credibility that surpass traditional cold outreach methods.
- **Efficiency and Performance:** Meetings arranged through Introduactable demonstrate higher engagement rates, faster time to close, and increased deal success.
- **Guaranteed Connections:** Using advanced algorithms and AI, Introduactable ensures connections are made via trusted third parties, with users only paying for successfully held meetings.

An Introduactable account is free for everyone including those looking to make introductions and for those looking to set meetings. Introduactable's cost is \$1,000 per meeting, with discounts for subscribers.

About: Introduactable operates within the business networking and AI sectors, focusing on AI, and demand generation for the enterprise environment.

If you would like more info, or to arrange an interview with a member of our executive team, please email media@introduactable.com.
