

Life Stories Of Amazing Aviators

Imagine if you could go back in time and talk to the early pilots and aviators such as Amelia Earhart, Amy Johnson, The Montgolfier Brothers and many more! Well now you can - in this fascinating title 'Amazing Aviators'.

AMAZING AVIATORS

INSPIRATIONAL STORIES

London, United Kingdom May 26, 2024 ([Issuewire.com](https://www.Issuewire.com)) - A must-read this June!

Amazing Aviators

By Dr Charles Margerison

Take A Fascinating Flight Through The Lives Of Celebrated Aviators!

These virtual first-person interviews give personal insights into their inspirational lives.

'Flying may not be all plain sailing, but the fun of it is worth the price". Amelia Earhart

Take To The Skies With These Iconic Aviators

As the world becomes smaller and air travel more commonplace, we should always remember the amazing people whose bravery and vision have made it possible for us to travel to the far ends of the earth.

In this unique collection of inspirational stories from Amazing People Worldwide, readers are invited to gain insights into the great dreams of Joseph Montgolfier - inventor of the hot-air balloon. The story behind the incredible innovations of the Wright Brothers, whose work on bicycles inspired them to invent a system of controlling aircraft, the principle of which is still used today, can also be explored.

From the bravery and pioneering endeavours of Amelia Earhart to the tenacious spirit of Yuri Gagarin, there is much to be learned from the lives of these amazing people who all played key roles in the history of aviation. Experience the excitement of great aviation breakthroughs in this unique collection of amazing stories. Learn how Igor Sikorsky created the helicopter. The background of many of their achievements remains unknown.

All Things Aviation In June!

So why should we celebrate these great names in June? There are so many aspects to aviation, and we found some interesting key dates that are linked with many of the Amazing Aviators in this inspirational title. Starting with the Montgolfier brothers and their wonderful hot-air balloons – these were first launched on 4 June 1783, and many others built on their work. William Boeing's Model 1 (B & W Seaplane) flew for the first time on 15 June 1916.

Women have made significant contributions to early aviation. This title explores the stories of amazing aviators such as Jacqueline Auriol and Amy Johnson. Also included is Amelia Earhart - she became the first woman to fly across the Atlantic Ocean as a passenger on 17 June 1928, and later flew non-stop solo over the same ocean!

Frank Whittle was born on 1 June 1907. His ingenuity led to him developing the jet engine – where would we be without this today? His story is well worth discussing.

Stories For Aviation Conversations

The Wright Brothers' amazing innovations are well documented, and their breakthrough is world famous. However, substantial evidence shows that Richard Pearse, a New Zealander, built and flew a powered fixed-wing plane before them, and maybe Gustave Whitehead also. Such aviation mysteries make for intriguing exploration.

Many of these aviators had short lives. On 11 January 1935, Amelia Earhart flew solo over the Pacific Ocean. If you could meet Amelia Earhart, what would you ask her? What first inspired her to fly? How did she come to make this momentous journey? Take some time to find out what there is to know about her fascinating life story, told from her own perspective. She pilots you through her life as a high achiever, breaking altitude records and hearts, as well as paving the way for a new generation of go-getting women aviators.

Charles Kingsford Smith, Raymonde de Laroche and Yuri Gagarin died at relatively young ages in plane crashes. Others, who lived to tell the tale, often did not write a biography. The background to their great achievements is not fully known. Amazing Aviators has endeavoured to be faithful to the facts as if the early aviators had returned to tell their stories in their own words. The areas covered reflect different aspects of aviation. We hope it inspires you.

About Amazing People Worldwide

Educational and entertaining, our inspirational book series makes the lives of a vast range of amazing people accessible like never before. People who'll enjoy the series are those who are determined to make the best of their time and are interested in learning about the many people who made their mark. Whatever your profession or interest, our library has stories that will speak to everyone in some way. Explore our library [HERE](#). The unique BioView format makes the stories accessible and engaging for everyone. Visit www.amazingpeopleworldwide.com to learn more.

About the Author

Dr Charles Margerison, President and founder of Amazing People Worldwide, is a Psychologist. He is also President of [Amazing People Schools](#). Dr Margerison has consulted widely for major organizations in the fields of organizational and educational psychology. He was previously a Professor of Management at Cranfield University, UK, and the University of Queensland, Australia. He founded Amazing People Worldwide in 2006 and is supported by a dedicated global team. He previously co-founded **Emerald Publications**, and **Team Management Systems** and has authored more than 30 books. Dr. Charles is also the creator of '[Can Do Kids Band](#)', a virtual music group that helps students to learn about countries and cultures through music. He has also developed [Imagineland](#), for early learners. You can follow him on LinkedIn.
