

Revolutionize Your Software Testing with ContextQA's All-in-One AI Solution!

Exciting News from ContextQA! Introducing Live Test Execution, the Latest Feature in AI-Driven Software Test Automation.

The banner features the ContextQA logo at the top center, with the text "Test Smarter, Not Harder: ContextQA's AI Advantage" below it. Underneath is the tagline "Your low-code solution for effortless, high-quality software". The central part of the banner displays a screenshot of the ContextQA interface, showing a "Recorded Video" of a test run and a "Trace View" with a table of test steps. To the left of the interface are two icons: a speedometer and a hand holding coins, labeled "Speed & Accuracy" and "Cost-Effectiveness" respectively. To the right are two more icons: a brain with a circuit and a person with a checkmark, labeled "AI-Powered Precision" and "Accessible Automation" respectively.

Test Smarter, Not Harder:
ContextQA's AI Advantage

Your low-code solution for effortless, high-quality software

Speed & Accuracy

Cost-Effectiveness

AI-Powered Precision

Accessible Automation

Austin, Texas May 23, 2024 ([Issuewire.com](https://www.issuewire.com)) - Software testing just took a quantum leap forward with [ContextQA](https://www.contextqa.com), the game-changing all-in-one AI software testing solution! Gone are the days of repetitive manual testing and tedious script-based automation.

ContextQA is here to revolutionize the software quality assurance process, save valuable time, and ensure top-notch quality products for users worldwide!

Why ContextQA?

Imagine a world where you can automate your manual testing, reporting process, release management, and overall test automation without writing a single line of code!

Sounds like a dream come true, right? ContextQA isn't just another tool; it's the **ONLY** AI tool on the market that automates the QA process effectively and efficiently. It automatically translates manual steps into automation, captures evidence, and makes release processes smoother and quicker.

By using ContextQA, you can save an astounding 80% of the time compared to traditional script-based automation and perform 10 times faster!

Introducing Live Test Execution!

Hold onto your seats, because ContextQA just got even better! We're thrilled to announce our latest feature: [Live Test Execution](#). This innovation offers real-time viewing of test case executions, including console logs and network apps.

Imagine watching your test cases play out in real time, with instant access to performance data and results. Our cutting-edge feature provides real-time analysis of execution time, pinpointing test case results as they happen. No more waiting, no more guessing.

Now, you can view, analyze, and act instantly, making sure your software sails smoothly through the testing phase and onto release.

How to Utilize Live Test Execution

Using our new feature is as simple as clicking a button! Just fire up ContextQA, navigate to the Live Test Execution feature, and start watching your tests live. With real-time console logs and network apps at your fingertips, analyzing test data has never been easier or more efficient.

We've poured our innovation into this feature to ensure it simplifies your workflow and enhances your testing experience. Enjoy real-time analysis without any extra steps or hassle!

Save the Date! Join the ContextQA Revolution

We're not just announcing a product; we're inviting you to join the ContextQA revolution. With options to book demos in both US and Indian time zones, we're here to make your transition to superior software testing as smooth as possible:

- US Time Zone: [Book US Demo](#)
- Indian Time Zone: [Book India Demo](#)
