

i18n Translation Manager from LUDECKE Achieves SAP® Certified Integration with RISE with SAP S/4HANA® Cloud

SAP Certified

Integration with RISE with SAP S/4HANA Cloud

Berlin, Germany Jun 17, 2024 ([IssueWire.com](https://www.issuewire.com)) - **LUDECKE GmbH** announced today that its **i18n Translation Manager for SAP® S/4HANA** has achieved SAP® certification as integrated with RISE with SAP S/4HANA® Cloud, making it the first translation solution to be certified for SAP S/4HANA. The integration helps organizations to translate almost any text from an SAP system.

“We couldn’t be happier to achieve this milestone”, said Martin Lüdecke, the company's founder and CEO. “This stamp of approval will enable even wider adoption of our add-on. We are very thankful to SAP for supporting us in this endeavor.”

With *i18n Translation Manager*, organizations can translate all the texts they have created when implementing or extending their SAP S/4HANA or SAP ERP solution, by developing Z Fiori apps, SAP GUI transactions, or forms, through Customizing, or by using SAP enhancement frameworks. The add-on enables them to identify exactly the texts they need to translate and manages the entire translation process.

The add-on also enables them to check out the texts they want to translate to their preferred translation environment. Once the translation is completed, they can then check in the translated texts and add them to transport requests or commit them to Git repositories, using a translation process that works with their development and change management setup.

[The SAP Integration and Certification Center](#) (SAP ICC) has certified the i18n Translation Manager for SAP® S/4HANA 3.02 for its integration with RISE with SAP S/4HANA Cloud using standard integration technologies.

About LUDECKE

LUDECKE helps SAP's customers and partners with all things SAP translation. The company supports customers that are rolling out their SAP to other countries and enables them to translate Z transactions and SAP Fiori apps (as well as any other texts in SAP systems) into 40 languages. The company develops and distributes i18n Translation Manager for SAP® S/4HANA.
