

NINE09 to Showcase Cutting-Edge eMobility Innovations at Eurobike 2024

Ahmedabad, Gujarat Jul 1, 2024 ([IssueWire.com](https://www.issuewire.com)) - [NINE09](#), a leading eMobility brand owned by [Monarch Innovation Private Limited](#), is set to make a significant impact at Eurobike 2024. The world-renowned exhibition, known for bringing together bicycle enthusiasts, manufacturers, and policymakers, will be held from July 3 to July 7, 2024, in Frankfurt, Germany.

NINE09, established in 2021 and backed by Monarch Innovation's strong engineering team, is dedicated to developing innovative city ride eMobility products. Last year at Eurobike 2023, NINE09 launched its flagship product, the CX01 eBike, which garnered significant attention and interest from dealers and end users worldwide. This success led to several collaborations with distributors across Europe.

For Eurobike 2024, NINE09 is proud to present the mass-produced CX01 eBike, along with its new variant, the CX02. The CX01 is a classical stepover eBike, while the CX02 is a step-through eBike designed for a wider audience and greater convenience. Additionally, NINE09 will introduce the CC01 eScooter, ideal for last-mile commutes, and the kiko, a kids' bike (non-electric), ensuring there is

something for everyone. All **NINE09 eBikes are CE certified**, meeting the highest safety and quality standards.

NINE09's product lineup is characterized by its innovative and smart designs, featuring modular frames. This modular frame concept's global patent application is currently in process. The modularity of NINE09 products enhances convenience in part replacement and service, allowing users to achieve a completely new bike by swapping just 1-2 parts. This modularity also supports the "Right to Repair" movement. This high level of customization is coupled with significant sustainability benefits, reducing packaging volume to 55% compared to conventional boxes, and lowering the overall carbon footprint associated with shipping and warehousing.

All NINE09 eBikes are smart bikes, integrated with the NINE09 application available on both the Android Play Store and iOS App Store. The app offers features such as navigation assistance on display, call control on display, ride monitoring, and anti-theft capabilities, ensuring enhanced convenience and security for users.

"We are excited to invite bicycle enthusiasts, industry professionals, and policymakers to visit us at [Eurobike 2024](#). Our slogan, '**Designed in India, Assemble Anywhere**' perfectly captures our vision of delivering globally adaptable eMobility solutions." said Pritesh Patel, Managing Director at NINE09. "Join us at Hall 9.0, Stall E10 to explore our latest products and experience their innovation firsthand with a test spin."
