Free Consultation by Dr. Navid Rahmani at NYC Dental Implants Center: (212) 256-0000

The dental office uses only the newest and most advanced dental equipment available on the market in

the USA. Dental implants are from Straumann, headquartered in Basel, Switzerland. It's the largest and most advanced dental implant company in the world. Choose the quality medical grade titanium or titanium alloy, the same materials used for other bone implants and for orthopedic joint replacements.

Dental Implants vs. Bridges

<https://www.nycdentalimplantscenter.com/>

Fixed Bridge	VS	Single Implant
• Replaces 1-3 missing teeth • Requires healthy teeth on either side to support it • Can cause decay to adjacent teeth over time • Lasts 5-10 years		• Replaces 1 missing tooth • Does not require healthy teeth on either side • Preserves bone loss in the jaw • Lasts a lifetime with proper care

Removable Bridge	VS	Multiple Implants
• Can replace multiple teeth • Can be removed for cleaning and maintenance • May not be as secure as multiple implants • Can last for three days and then		• Can replace any number of teeth • Not removable • Most durable and stable option • Requires surgery and healing time
