

Revolutionizing Home Comfort: Thermomate Launches Cutting-Edge Tankless Electric Water Heater

Thermomate, a leader in home comfort solutions, announces the launch of its new Electric Tankless Water Heater. This advanced water heater provides instant, endless hot water, enhancing energy efficiency and saving space.

North Charleston, South Carolina Jun 18, 2024 ([Issuewire.com](https://www.issuewire.com)) - About Thermomate:

Thermomate is committed to providing high-quality, energy-efficient home appliances. With a focus on advanced technology and sustainable solutions, Thermomate aims to enhance everyday living with

products that are both innovative and reliable. The company's range includes kitchen appliances, electric heating solutions, and outdoor living products, all crafted to meet the highest standards of performance and safety.

Product Highlights:

- **Instant Hot Water:** Heats water in just 3 seconds, ensuring a continuous supply without the wait.
- **Energy Efficiency:** Self-modulating technology with a 99.8% efficiency rate can reduce water heating costs by up to 60%.
- **Space-Saving Design:** Compact, wall-mounted unit ideal for small homes, apartments, and areas with limited space.
- **User-Friendly:** Digital temperature control with adjustments in 1 ° increments from 80 °F to 140 °F.
- **Safety Features:** ETL certified with overheating protection, automatic shut-off, and leak prevention.

The Thermomate Electric Tankless Water Heater is available in multiple power variants, including 11kW, 18kW, and 27kW, catering to different household needs. It is designed for easy installation and low maintenance, featuring separated heating elements to prevent scale and corrosion.

Sustainability Commitment: Thermomate's tankless water heaters contribute to sustainability by reducing energy consumption and greenhouse gas emissions, offering an environmentally friendly solution for modern homes.
