

Waxed Branding Revolutionizes Corporate Branding with Cutting-Edge DTF Printing Technology

Randburg, Gauteng Jun 25, 2024 ([Issuewire.com](https://www.issuewire.com)) - [Waxed Branding](#), a leading corporate branding solutions provider, has announced the acquisition of the best DTF (Direct-to-Film) printer in South Africa, revolutionizing the way businesses approach their branding needs. The new state-of-the-art printer, capable of producing up to 15,000 full-color A5 prints per day, will enable Waxed Branding to deliver unparalleled quality, speed, and efficiency to its clients.

Established 15 years ago, Waxed Branding has built a reputation for excellence in the corporate branding industry. The company's commitment to quality, precision, and sustainability has made it a preferred partner for large corporates and branding companies across South Africa.

"We are thrilled to introduce this cutting-edge DTF printing technology to our clients," said Andrew, Waxed Branding's branding expert. "This investment demonstrates our dedication to providing the best possible solutions to elevate our clients' corporate identities and ensure consistent branding across all their materials."

The new [DTF printer](#), which utilizes advanced inkjet technology, offers several advantages over traditional printing methods. DTF printing allows for direct application of designs onto a wide range of

materials, including textiles, plastics, and metals, without the need for cutting or welding. This process ensures a seamless and durable finish, making it ideal for corporate branding applications such as uniforms, promotional items, and signage.

One of the most significant benefits of the new DTF printer is its impressive output capacity. With the ability to produce up to 15,000 full-color A5 prints per day, Waxed Branding can now handle large-scale projects with ease, ensuring quick turnaround times and meeting the demands of even the most time-sensitive clients.

The DTF printing process also aligns with Waxed Branding's commitment to sustainability. The eco-friendly materials and processes used in DTF printing reduce waste and minimize the environmental impact of corporate branding. This commitment to responsible branding allows clients to feel confident in their choice of partner and the positive impact their [branding](#) has on the planet.

"Our investment in this cutting-edge DTF printer is a testament to our dedication to providing our clients with the best possible solutions," said Andrew. "We are excited to see the impact this technology will have on the corporate branding industry and to continue delivering exceptional results to our valued clients."
