Changsha, Hunan Jul 11, 2024 ([IssueWire.com](https://www.IssueWire.com)) - **Baowi Steel Manufacturing Co.,Ltd** is a steel production enterprise integrating ironmaking, steelmaking, and rolled products. Develop emerging industries such as industrial finance, industrial park development and operation, and information technology. The main iron and steel products are formed into four series of strip, section steel, special steel and building materials, which are sold well all over the country and exported to more than 70

countries and regions. Among these products, carbon steel pipes and stainless steel pipes also occupy an important position. Specific products include [seamless steel pipes](#), [ERW steel pipes](#), [SSAW steel pipes](#), [casing and tubing](#), drill pipes, drill collars, pipe fittings, etc. We are committed to providing high-quality products and services to ensure that every need of our customers is met.

Baowi Steel is mainly equipped with 2x 180m² sintering, 2x 1080m³ blast furnace, 1x120t converter and two high-speed continuous rolling production lines. Baowi Steel has successively passed ISO9001 quality management system, ISO14001 environmental management system, OHSAS18001 occupational health and safety management system, ISO150001 energy management system certification. And industrialization and informatization integration management system certification. The main products are high-quality carbon structural steel, billet steel, bearing steel, hot-rolled coil, hot-rolled sheet, cold-formed sheet, pickling sheet, galvanized sheet, section steel, etc.

Baowi Steel develops energy saving and carbon reduction, and builds a green future. Actively implement the national "double carbon" strategy, comprehensively implement ultra-low emission transformation, actively promote clean production throughout the process, adopt advanced energy-saving and emission-reduction techniques and technologies, control pollutant emissions from the source, and strive to improve energy and resource utilization efficiency and energy consumption levels. Reach the advanced level of the industry. Always adhere to the concept of "environment priority, green development", continue to increase investment in the implementation of environmental protection, actively participate in the construction of social ecological civilization, so that the garden factory and the city can coexist and coexist.
