

Ember Flash Aerospace Advances to Next Round of XPRIZE Competition for Wildfire Detection and Suppression

San Diego, California Jul 15, 2024 ([Issuewire.com](https://www.issuewire.com)) - Ember Flash Aerospace is proud to announce that it has successfully advanced to the next round of the prestigious XPRIZE competition, focused on innovative solutions for detecting and suppressing wildfires. As part of this milestone achievement, Ember Flash Aerospace will share in the milestone prize purse of \$750,000, which will be equally divided among all advancing teams in the Track B Technical Verification Round.

The announcement of the Track B Qualified Teams was made at the 2024 Safety and Security Summit at Esri in San Diego, California, USA. This summit, held on July 14, 2024, will feature a panel discussion co-hosted by XPRIZE in collaboration with Esri and Pacific Gas & Electric, offering a platform for discussion on advancements in wildfire detection and suppression technologies.

“We are thrilled to be recognized among the leading innovators in this crucial field,” said Joseph Norris, Co-founder at Ember Flash Aerospace. “Our team is dedicated to developing cutting-edge solutions that can make a significant impact on wildfire management and ultimately help save lives and protect the

environment.”

Teams advancing to this round have demonstrated exceptional technical capabilities and a commitment to addressing the global challenge of wildfires. XPRIZE will further highlight these achievements in a blog post on the XPRIZE Wildfire website.
