Bengaluru, Karnataka Sep 30, 2024 ([Issuewire.com](https://www.issuewire.com)) - In this digital age, a lot of individuals find it difficult to spend time with their families who live far from each other. Video chat enabled multiplayer games could provide easy way to families and friends to have fun together. Further players are looking for a single destination where they can enjoy variety of casual games and compete with fellow gamers and win prizes. Considering such needs, Global Grand Gaming Pvt Ltd has launched GrandGaming.com - an all-in-one platform that allows enjoying the pleasure of gaming with family and friends while staying competitive. This platform is perfect for people who love gaming and want to stay in touch with their loved ones.

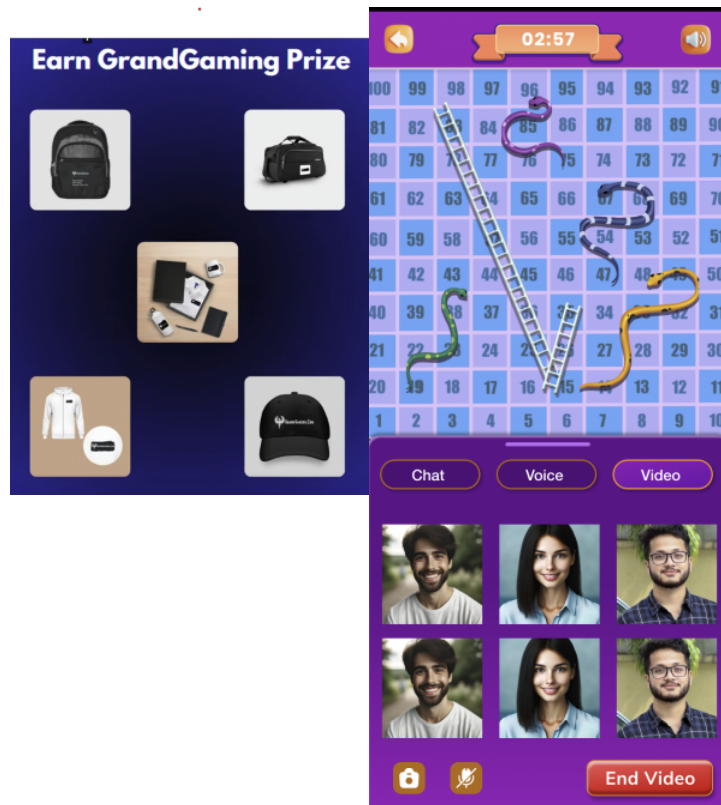

GrandGaming.com is a global gaming platform and all of its games can be played for free. The games can be played on PC or laptop (by visiting www.GrandGaming.com) as well as on android phone and iPhone by downloading respective apps from PlayStore and Appstore. GrandGaming is bringing a change in the field of gaming by offering its users free gifts and other rewarding opportunities based on their position in the leaderboard.

The platform also provides a 'Video Call' feature where players can see each other and play games together at the same time. GrandGaming introduces innovative "Spectator" mode which enables players to sit back and enjoy watching others playing. Currently, the platform is offering 15 games which is a mix of single and multiple player games. Some of the interesting multiple player games are car racing, chess, snakes and ladder & 8 ball pool while interesting single player games are - boat racing, miner quest, bird fury, soccer etc. Moving forward GrandGaming plans to add at least 5 new games every month to the GrandGaming.com website and android and iOS mobile apps.

Founder & CEO of Global Grand Gaming Pvt Ltd, Manish Gulati, a former employee of Microsoft & Google, says, "Typically friends and family members remain at different locations because of study or work or leisure which leaves very little opportunity to meet, talk, and do things together. We addressed this by launching various social gaming features on Grand Gaming mobile & web apps".

GrandGaming games are available for all kinds of devices and users can get access through mobiles, desktops, laptops, and tablets as well. Whether a user likes to play solo or with others, this platform caters to every gaming need. Visit <http://www.grandgaming.com/> and install the application to enjoy.
