

Green Energy Treatments Inc/GEGI Inc. Come to Terms with Technology Heavyweight LG

Dallas, Texas Jul 21, 2024 ([IssueWire.com](https://www.issuewire.com)) - Green Energy Treatments/Green Tech Power/Green Energy Global International has officially accepted a partnership proposal with LG, a renowned electronic and technology powerhouse. This collaboration marks a significant milestone for both organizations and promises to bring forth groundbreaking innovations in the field of renewable energy. Sr VP of Distribution Joel Deluca states, "Our teams have been diligently working towards finalizing the partnership agreement, and I am pleased to confirm that all terms and conditions have been mutually agreed upon" The official signing of the partnership marks a huge step in solidifying our commitment to driving sustainable solutions and technological advancements in the energy sector.

We are excited to share that our new state-of-the-art plant in Dallas, Texas will serve as the hub for producing the most advanced EV stations. This facility will not only showcase cutting-edge technology but also demonstrate our shared vision for a greener future. The company chose to locate the plant in the Alliance Center area of Fort Worth as a "reflection of LG's dedication to the region as a pivotal hub for innovation and manufacturing," LG's senior vice president of business to business sales Michael Kosla told The Texan via email. LG has had a consumer electronics and home appliance distribution center in the city for three decades, and the charger assembly plant will be located in an existing building that is being repurposed.

Additionally, we have developed a range of innovative programs tailored for clients further emphasizing our dedication to sustainability and community engagement. Our partnership holds immense potential for driving positive change and shaping the future of renewable energy. We look forward to the exciting opportunities that lie ahead for Green Energy Treatments/Green Power Tech and LG.
