

GTA Toronto Pest Control Addresses Rising Rat Population in the Greater Toronto Area

Combatting the Rat and Stinging Insect Surge in Toronto

Toronto, Ontario Aug 1, 2024 ([IssueWire.com](https://www.issuewire.com)) - Rat population growth is a significant worry for both households and businesses in the Greater Toronto Area. In response, GTA Toronto Pest Control, a leading pest management company serving the Greater Toronto Area, is taking proactive steps to combat the large increase in stinging insects this summer. The company is stepping up its efforts to safeguard the safety and comfort of citizens and businesses as the city's hot and humid circumstances cater to wasps, hornets, bees, and other stinging insects.

Not only are they an annoyance, but rats present severe threats to health. In addition to contaminating food supplies and carrying diseases like hantavirus, salmonella, and leptospirosis, they can also cause structural damage to properties by nibbling on wood, insulation, and wire constructions. Rat activity in Toronto has significantly increased this year, ascribed to multiple variables, including warmer winters, increasing development, and urban growth.

"We've had a 30% spike in rat-related calls in the last six months," says Naeem Choudhry, from GTA Toronto Pest Control. "This trend is disturbing and requires immediate intervention from the public and pest control professionals."

To tackle rat infestations, we provide a broad range of services, including careful inspections, baiting, trapping, and exclusion techniques. To stop future infestations, their skilled [pest control Toronto](#) specialists are trained to locate entry sites, remove nests, and implement preventative measures. The company's integrated pest management approach ensures minimal environmental impact while maximizing pest control efficiency.

"Our priority is the health and welfare of our clients," she added. "We work closely with both residential and commercial clients to develop customized pest control plans that suit their particular requirements and ensure peace of mind."

To avoid rat infestations, GTA Toronto Pest Control advises locals to be proactive.

"Prevention is key. Along with sealing any access openings in their homes and businesses, we're also urging Toronto people to lock up their trash cans and remove any outdoor food sources."

GTA Toronto Pest Control remains committed to providing humane, practical, and ecologically friendly solutions to the expanding rat problem.
