This significant milestone marks a new chapter in iPostBox's journey towards revolutionizing the way we handle mail and communication. iPostBox is a virtual letter box and post office in one place allowing you to send and receive iPosts in a click. The service also includes features like digital signature and virtual reality technology to read and manage your virtual letter box with virtual reality glasses. iPostBox is a startup based and incorporated in Dublin Ireland since October 2020 and has been recognized as the best technology innovation and the best early stage startup in Ireland.

iPostBox is thanking its dedicated team, partners, and customers for their unwavering support. Together, they are shaping the future of communication!
