New York City, New York Jul 29, 2024 ([IssueWire.com](https://www.issuewire.com)) - New Era Technology is thrilled to announce an insightful webinar, "Securing GenAI Virtual Assistants," aimed at addressing the critical need for robust security in the deployment of Generative AI virtual assistants. This event is specifically designed for professionals responsible for ensuring the security of their organizations, providing actionable insights to protect AI implementations.

Event Details:

- **Date:** August 8th, 2024
- **Time:** 10:00 AM EST

Why Attend?

AI is omnipresent, and securing your digital landscape is imperative. This webinar will provide you with practical steps to secure your GenAI virtual assistants, helping you understand and mitigate the critical risks associated with these technologies, such as hallucinations, bias, ethical concerns, and potential data breaches.

Things You Will Learn:

- Explore various types of GenAI deployments and discover how they can transform your business
- Dive into a comprehensive threat model for GenAI Virtual Assistants
- Understand the critical security requirements needed to safeguard your systems
- Learn effective strategies to mitigate unacceptable risks and align them with your organization's risk tolerance levels
- Understand the risks of virtual assistants, including hallucinations, bias, reputation damage, and potential data breaches

Registration:

Don't miss this crucial opportunity to secure your AI-driven systems. Register now to ensure your organization stays at the forefront of AI security in the evolving landscape.
