

Shift to SAP S/4HANA from G3G (UK) Limited Recognised as an SAP-Qualified Partner-Packaged Solution for SAP S/4HANA®

Manchester, United Kingdom Jul 29, 2024 ([Issuewire.com](https://www.issuewire.com)) - Shift to SAP S/4HANA offers growth market companies a path to success by streamlining and derisking the journey to SAP S/4HANA Cloud.

G3G, a leading provider of SAP enterprise solutions, proudly announces the launch of [Shift to SAP S/4HANA](#) which has been recognised as an SAP-qualified partner-packaged solution, delivering an accelerated path to digital transformation for clients who are currently on SAP ECC 6.0.

As businesses worldwide seek to enhance their operational efficiency and unlock new opportunities in the digital era, the shift to SAP S/4HANA Cloud® has become imperative. However, navigating this transition can be complex and time-consuming. Recognising this challenge, G3G (UK) Limited has developed *Shift to SAP S/4HANA* to empower businesses with a seamless migration process for the digital economy.

"With the launch of *Shift to SAP S/4HANA*, we are excited to provide businesses with a streamlined transition to SAP S/4HANA Cloud," said Ted Wood, Managing Director at G3G (UK) Limited. "Leveraging our deep domain expertise alongside SAP's state-of-the-art technology, we are committed to accelerating our clients' digital transformation, driving efficiency, and fostering sustainable growth."

Shift to SAP S/4HANA offers an approach with five phases:

Pre-flight Phase: An automated assessment that is free of charge; provides an overview of your SAP environment. The benefit of the Pre-flight assessment is that it provides very early insights into transformation and migration projects by identifying critical configuration and risk areas. It can accelerate project blueprint and scoping activities. Importantly, all the results are available to share with your business.

Assess Phase: An in-depth assessment for SAP S/4HANA Cloud gives you the opportunity to assess the technical and functional feasibility of converting your system and the quality of your financial and material data for migration. This puts you in a position to start cleansing your data, before or in parallel with your POC. The benefit of doing an in-depth assessment is that you gain total visibility on the different workstreams that are involved in the SAP S/4HANA conversion. This low-cost assessment option on your existing ECC production system can be delivered over a period of 4-6 weeks.

Approach Recommendation Phase: G3G supports all conversion approaches and offers the ability to reduce the footprint of your SAP systems by enterprise and/or time slice to deliver lean, business-aligned landscapes. The approach results in smaller, leaner systems which increase agility for current and future upgrades. It allows you to take only the most recent history to SAP S/4HANA, with older data (such as data required for compliance) being available via our SaaS web application Archive Central, retaining data structures and linkages.

Verify Phase: A low-risk, lean, low-cost engagement to accelerate your decision-making process for S/4HANA Cloud adoption. The offer includes the building of a Proof of Concept (POC) SAP system and converting it to SAP S/4HANA Cloud. As part of this process, G3G provides you with a technically upgraded SAP S/4HANA solution (based on a copy of your environment) for users to engage and build

familiarity with. This option can be up and running in as little as 14 weeks.

Transform Phase: Accelerate your shift to the SAP S/4HANA Digital Core using the power of our landscape management specialists, and put your organisation on the roadmap towards an Intelligent Enterprise. This option includes the SAP S/4HANA technical migration of a three-system SAP ECC landscape – Development (DEV), Quality Assurance (QAS), and Production (PRD) – and can be carried out in 21 weeks.

Raven Mahabeer, General Manager: of Information Management at Aberdare Cables can attest to the success of the *Shift to SAP S/4HANA* methodology saying: “From an SAP S/4HANA Cloud perspective, we have achieved value creation across the supply chain. G3G guided the process through to fulfillment. Aberdare had historical data that was a challenge to most service providers to convert into an SAP S/4HANA environment whereby they were able to successfully migrate 20 years of data. What’s coincidental was that the month after implementing S/4HANA, we had a record-breaking sales revenue month. This particular project just seamlessly integrated into our processes.”

SAP-qualified partner-packaged solutions are built, sold, and supported by SAP partners. These integrated solutions combine SAP software with a partner’s industry or line-of-business expertise, services, customisations, or applications so that clients can run at their best whether they have 100 employees or more than 10,000.

Packaged solutions create a unique client offering with a pre-defined price, scope rapid implementation timeline, and fast time to value. To obtain this designation, G3G (UK) Limited met specific criteria and was qualified by the SAP Partner Solution Center organisation.

G3G UK Limited is also a partner in the SAP PartnerEdge® program. The SAP PartnerEdge program provides the enablement tools, benefits, and support to facilitate building high-quality, disruptive applications focused on specific business needs – quickly and cost-effectively.
