

The Web3 Carnival: Bitlayer Summer Carnival Kicks Off

Hong Kong, Hong Kong S.A.R. Aug 9, 2024 ([IssueWire.com](https://www.issuewire.com)) - On July 26, Bitlayer, a leading Bitcoin Layer 2 solution provider, and DeGame, a top NFT game aggregator, officially launched the Web3 Carnival event, Bitlayer Summer Carnival.

This month-long grand carnival offers users substantial rewards, including IDO (ETH) whitelists, USDT prize pools, token/NFT airdrops, and more.

The event features at least 20 in-depth gaming tasks, supported by four types of reward distribution methods: prize pool lottery, game ranking, customization, and FCFS. Participating project parties will deploy on the Bitlayer chain and set up corresponding tasks, inviting Web3 users to join, complete quests, and earn rewards. Tasks include following social media, interacting with specific contract addresses on Bitlayer, holding assets on Bitlayer, and more.

Running from July 26 to the end of August, this carnival is not only a “wealth celebration” in the Web3 field but also a synergy and integration of Bitcoin ecosystem, GameFi, SocialFi, and community across technology, liquidity, and user dimensions. By integrating quality project assets, NFTs, and users, the carnival is expected to attract over 100,000 users from various fields, engaging in game achievements, on-chain interactions, and social behaviors to support their favorite projects, communities, and ecosystems, earning significant rewards in return.

01 Web3 Carnival Gala

Bitlayer, one of the hosts of the carnival, is a leader in Bitcoin Layer 2 solutions. Following the

completion of an \$11 million Series A financing on July 23, Bitlayer has emerged as one of the most prosperous ecosystems in Bitcoin Layer 2s, boasting over \$500 million in TVL and 300 ecosystem projects.

During the month-long carnival, Bitlayer will actively support ecosystem projects, anticipating that Bitlayer's uniqueness and technology will unlock new use cases and opportunities for participating projects and users. Bitlayer's team, along with other Bitcoin ecosystem-focused products, also looks forward to exploring new collaboration opportunities.

In addition to robust on-chain technology and ecosystem support, DeGame will leverage its strengths in Social-Fi, Game-Fi, user base, and community influence to assist participating project parties in acquiring and converting users into loyal, organic, active participants, promoting project growth.

As of now, DeGame has a total of 1,034,635 registered users; 5,350 communities in its Community module; and 3,105,835 tasks completed by active users. Its leading community collaboration achievement system and comprehensive, flexible automated modules provide the most suitable solutions for migrating Web2 products to Web3, GameFi, and NFT directions.

The strong partnership between Bitlayer and DeGame emphasizes their commitment to supporting innovation in the gaming and digital assets sectors. Dozens of popular projects and communities have already participated in this carnival, including Bitcoin protocols, cross-chain transmission protocols, community GameFi, NFT AAA games, and more, showcasing a vibrant scene.

With Bitlayer standing out in Bitcoin Layer 2s, the buzz around DeGame, participation from popular communities, and focused reporting by leading industry media, the Bitlayer Summer Carnival is set to be the most notable Web3 event this summer.

02 Popular Project "Wealth Creation" Opportunities

Since the announcement of Bitlayer Summer Carnival, it has garnered widespread attention, boosted by popular projects such as Football Oasis (FO), Bool Network, oooo, and AtDawn. These emerging projects not only provide high-quality gaming experiences and enrich event content but also significantly enhance market enthusiasm and interest.

Firstly, Football Oasis (FO)

Football Oasis (FO) is a football community game based on the BASE blockchain, consisting of two core components: FoPass and Oasis. FoPass is a team pass representing virtual player ownership and attributes. Players can mint, buy, or trade FoPass, participate in sharing the "UEFA 2024 prize pool," and receive airdrops. Oasis is a creative and imaginative virtual football world where players are not just spectators but also strategists and active participants.

Event tasks: Follow Twitter, Telegram, register, and complete a game.

Reward form: 100 IDO whitelists (worth 5,000 USDT).

Secondly, Bool Network

Bool Network is a permissionless, decentralized, and secure Bitcoin verification layer aimed at expanding the Bitcoin network without altering its consensus, thereby promoting the Bitcoin ecosystem's

prosperity.

Event tasks: Follow Twitter/Telegram, join Discord, interact with designated contract addresses on Bitlayer, stake at least \$200 in tBOL for more rewards.

Reward form: tBOL points worth 10,000 USDT.

Thirdly, oooo

oooo is the first modular full-chain interoperability and communication protocol supporting the Bitcoin ecosystem, facilitating seamless and secure data and asset flow within the Bitcoin ecosystem.

oooo's primary use case is fast, secure, and reliable cross-chain transfers, with over 1 million transactions completed and 600,000 wallet addresses, setting a new standard for blockchain interoperability efficiency and scalability.

Event tasks: Follow @oooo_money, join Discord, like and retweet event information, use oooo tokens to interact with designated contract addresses on Bitlayer.

Reward form: 10,000 EOS (worth 2,000 USDT) and 80,000 Goooo points.

Lastly, AtDawn

AtDawn is a AAA-quality, multi-chain interoperable war-themed STG game offering PVP and PVE modes, supporting deathmatch, capture the flag, kill, bomb, and other gameplay types, along with vehicles, air support, and other game functions. Game results are submitted for on-chain settlement, and smart contracts issue corresponding rewards (NFTs, EXP).

Event tasks: Follow Twitter, like and retweet event information, join Discord, hold avatar NFT.

Reward form: 40,000,000 points, exchangeable for airdrops, AtDawn game whitelist.

03 Bitlayer x Degame Summer Carnival Badge

We believe that the above popular projects and rich blockchain activities will provide users with broad opportunities and revenue channels.

Meanwhile, to better encourage player participation and enhance on-chain interaction experience through diverse tasks, Bitlayer Summer Carnival will also launch the Summer Carnival NFT SBT—Bitlayer x Degame Summer Carnival Badge (Bitlayer x Degame Summer Carnival Badge).

SBT is proof of ownership for participants in this carnival event. Users who complete all tasks of any community and Bitlayer's cross-chain tasks will receive SBT. SBT holders will receive exclusive Bitlayer points rewards and unlock a variety of rich rewards.

In Conclusion...

Most of the current Web3 light projects are still in the early cold-start phase. Bitlayer Summer Carnival offers NFT game enthusiasts and developers broader opportunities, enabling B-end to efficiently acquire and retain real users, while C-end users can discover the latest, most exciting projects and

games and hold long-term value NFTs.

The collaboration between Bitlayer and DeGame might inspire new thinking, efficiently utilizing funds and unleashing creativity, hinting at enormous development potential.
