NANO TRILOGY I: MERCENARIES OF LIFE
AND DEATH

Manila, Luzon Aug 15, 2024 (Issuewire.com) - What would you do if you came across an invention where a certain molecular system can either cure or kill humanity?

Prepare to be blown away with Wayne E. Criss' works which will be displayed in Bookmarc Alliance's exhibit in the upcoming Manila International Book Fair this September 11-15, 2024 at the SMX

Convention Center in Pasay City, Manila.

Immerse yourselves in a world where nanotechnology is a threat to the human race. ***Nano Trilogy I: Mercenaries of Life and Death*** is a thrilling narrative that revolves around the creation of custom-designed molecular weapons to eliminate scientists who produce ultra-competitive products that threaten the products of conservative industrialists.

These molecules killed the fathers of four teenage boys from Boston, Istanbul, Johannesburg, and Nanking. For years, these boys trained themselves to seek revenge for their deceased fathers. Will their efforts pay off? Will they ever get justice for the deaths of their fathers?

The author, Professor Doctor Wayne E. Criss, has continuously taught his entire professional life in several private and university-affiliated high technology laboratories and clinics in the USA, Europe, and Asia. He has written numerous medical research papers and books won more than 20 national and international scientific awards, and regularly consulted for government and private science funding agencies. As a prominent medical scientist, Dr. Criss is now drawing from his experience and has begun creating exciting novels with unusual “modern” ideas.
