

HMS Medical Systems Unveils the UNISTIM 5n: A Premier Interferential Therapy Solution

Chennai, Tamil Nadu Aug 8, 2024 (Issuewire.com) - HMS Medical Systems is excited to announce the launch of the UNISTIM 5n, a cutting-edge interferential therapy equipment that represents the pinnacle of electrotherapy innovation. This sophisticated device is engineered to deliver superior therapeutic results with user-friendly operation, making it an invaluable tool for healthcare professionals.

The UNISTIM 5n stands out with its advanced interferential therapy capabilities, integrating both medium and low frequency currents into a single, versatile unit. Its comprehensive features include four channels for flexible electrotherapy applications, allowing healthcare providers to treat up to two patients simultaneously with enhanced efficiency.

Key Features of the UNISTIM 5n:

- **Advanced Interferential Therapy:** Utilizes both medium and low frequency currents to provide effective interferential therapy.
- **Dual Mode Operation:** Supports Electrotherapy-1 and Electrotherapy-2 modes, which can be used simultaneously or independently.
- **Simultaneous Patient Treatment:** Capable of treating two patients at once, optimizing clinical workflow.
- **Extensive Pre-Programs:** Includes 77 pre-programmed protocols for various conditions, ensuring precise and effective treatments.
- **Customizable User Settings:** Allows for storage of personalized settings and patient details in user memory for convenience.
- **Enhanced Safety Features:** Incorporates a cable and electrode checking mode, electrode placement illustrations, and an advanced patient safety system.
- **Intuitive Interface:** Features a 5-inch color touch display for clear, easy navigation and an encoder for precise intensity adjustments.
- **Compact and Durable Design:** Lightweight, compact, and housed in a robust plastic cabinet for longevity and ease of use.
- **Independent Channel Control:** Provides independent intensity variation for each channel, catering to specific therapeutic needs.

The UNISTIM® 5n exemplifies HMS Medical Systems' dedication to advancing medical technology. Its innovative features, combined with its user-centric design and emphasis on patient safety, make it a premier choice for modern therapeutic practices.
