

A PCOMBINATOR initiative - PASSION FRAMEWORK: Innovating Audits, Research, and Proof of Concepts for Global Impact

Accelerating Audits, Research, and Startup Spin-Offs Worldwide. Internships, and Innovation at the Core of Student Success. Setting up free entrepreneurship varsities within college campus Benchmarking Innovation Through Audits, Research & Startups

Passion Framework DIMENSIONS

PRUTL DIMENSIONS

Pune Cantonment, Maharashtra Sep 4, 2024 ([Issuewire.com](https://www.issuewire.com)) - The PASSION FRAMEWORK, an innovative Made-in-India initiative founded by Dr. Prakash Sharma, proudly announces the expansion of its capabilities with the integration of **PRUTL Dimensions**, a groundbreaking system designed to audit any startups, MSME, SME, NGOs covering over 500+ sectors and also to groom and nurture rural talent and foster holistic growth across organizations. It aims to leverage expertise of senior Industry professionals from all sectors to take their inputs and build best practices for audits.

In 2022-23, PASSION FRAMEWORK was recognized by UBI Global as one of the **Top Asia Pacific Challengers**, celebrating our excellence in startup acceleration and the development of a robust mentor network. This accolade underscores our commitment to driving global innovation from the grassroots level to the corporate sphere.

A recent survey conducted by Villgro Innovation Foundation as part of IMMPACT program, in collaboration with Harvard Business School and Chicago Booth School of Business, yielded outstanding results:

- From our clients, including colleges where we have established free entrepreneurship varsities.
- From our suppliers, comprising innovators and consultants who voluntarily collaborate with us.
- High satisfaction from students who benefit from our advanced IT skilling programs, offered at little to no cost.

PASSION + PRUTL Dimensions: A Fusion of Ancient Wisdom and Modern Innovation

The PASSION + PRUTL Dimensions framework is a revolutionary audit and innovation system that combines the wisdom of medieval thought leaders with contemporary best practices. It not only focuses on compliance and operational efficiency but also emphasizes well-being and peace within individuals and organizations. The **PRUTL Soul Dimensions** assess the intrinsic values of businesses and individuals, promoting a research and innovation-driven mindset that aligns personal and organizational goals with ethical practices and sustainable growth.

This comprehensive, scalable framework is designed to be accessible to startups, MSMEs, and rural businesses, offering cost-effective audits that were previously out of reach. PASSION FRAMEWORK integrates methodologies from the medieval era to the present, mapping them to almost any existing international standard, making it a versatile tool for organizations worldwide.

College Internship cum Entrepreneurship Varsity Programs

Over 500+ students and 65 projects being implemented in areas of Artificial Intelligence, Robotics, Cyber Security, Mental Health, Agriculture, News Media and diversified topics. The academicians and even the industry members associated with us do feel research and innovation is vital for skilling resources and our near free advanced IT skilling programs does support the individuals who cannot afford high cost training programs. Our focus is to bring affordable high quality education and audit mechanism in Industry to improve quality.

With over 25+ colleges where in we set up free entrepreneurship varsity and over 200+ who have shown active interest in our efforts to build qualitative innovation centers within college, it is an ongoing process. College collaborations have their own challenges and there could be a relatively slower transition to adapt the PASSION FRAMEWORK model. However we have got very good success with few colleges and most importantly the students, academicians are extremely happy with the opportunities to innovate and excel.

We have the largest number of professional network with over 1000+ seniors globally connected to us and with a consistent lean approach, we have managed to keep improving the research aspect which is vital and needed for any startup founder. Reviewing over 300+ startups in last few years we observed that startups lack the edge over large corporates and usually tend to have either governance issues or have instable processes. There is a felt need for startups who get seed funded and subsequently get VC funded to keep improving their processes.

A Call to Collaborate

As we continue to expand our global reach, we invite corporates, NGOs, and academic institutions to join us in driving innovation, creating impactful solutions, and building a brighter future for students, entrepreneurs, and innovators around the world.

Look forward to collaborate with Angel Groups, Incubators, Venture Capitalists and Family offices apart from Global Colleges and Universities who wish to assess startup spin offs.

Also support Corporates, NGOs, SME, MSME, Colleges, Schools who wish to set up innovation centers or research laboratories using Industry-Academic interfaces.
