Recently MailsDaddy updated some advanced features and launched [OST to PST Converter](#) with quick migration and loading speed. As we know, Outlook enables users to save all email databases in OST and PST format. Sometimes, due to some unnecessary reasons, the user's OST files get corrupted. In this case, users are required to convert OST to PST file format.

MailsDaddy OST to PST Converter is a top-notch solution to export OST files into PST format. Using this advanced solution users can convert OST to PST, EML, MSG, MBOX, RTF, HTML, Contacts in CSV/CVF, and Calendar details in ICS format. This program also has the ability to directly upload OST files into Office 365 and Live Exchange Server. The software perfectly scans and recovers all damaged OST files and represents all email databases in the software preview panel like; email, contact, calendar, notes, tack, attachments, etc. Using this utility users can export single or multiple OST files into PST format.

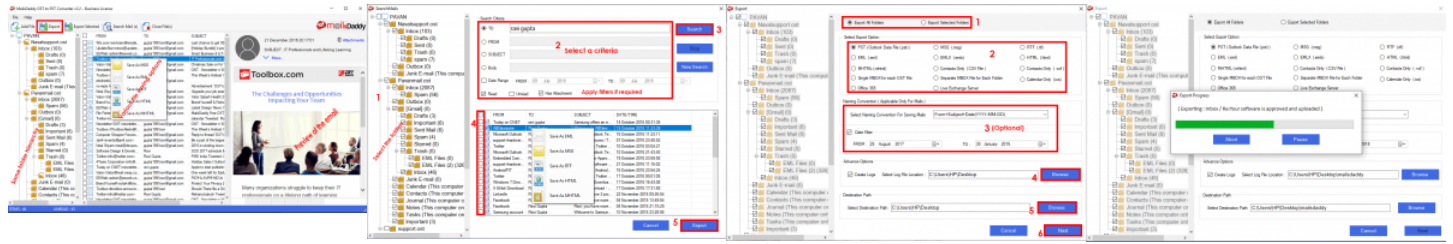

Here users can easily filter, find, and convert some selected OST file databases into Microsoft PST format using different meta-searching options, like To, From, Time, Subject, etc. It enables users to move multiple OST mailboxes into a single or separate PST file. This trusted application can quickly split a heavy OST file into small PSTs. It always maintains all folder structure, text formatting, meta properties, and HTML formatting. Users can import the converted PST file in Outlook 2019, 2016, 2013, 2010, 2007, and other earlier editions. Users can install this outstanding solution on all Windows supported.

New Updated Features in This OST File Converter Tool:

- 1: Quickly load and display all email databases in the preview section.
- 2: OST to PST conversion speed has become very fast.
- 3: There is no possibility of data loss. 100% data conversion guarantee.
- 4: A Date Filter option is available to export required date emails into PST format.
- 5: Can select single or multiple emails from the preview panel and export them into PST.
