

Himatch Electronics - The Leading Cable and Connector Solutions Manufacturer in China

Himatch Electronics is another name for reliable, durable and high-quality cables and components.

Shenzhen, Guangdong Sep 14, 2024 ([Issuewire.com](https://www.issuewire.com)) - Himatch Electronics is another name for reliable, durable and high-quality cables and components. The company has garnered many certifications - ISO-9001 and ISO14000, along with other patents and high-tech certifications. Himatch Electronics is a reputable PCIe and [MCIO cable manufacturer](#) based in Shenzhen, China. Moreover,

their team has consistently created and provided top-quality products for various industries, including aerospace, communication systems, medical devices, industrial automation, drones, and others. To learn more about how their cables and connectors can be useful for you, please visit: <https://himatch.cn/>.

In addition, Himatch Electronics is also an MCIO cable manufacturer. The company designs stable, durable, and high-quality wires that are widely used in critical applications across various industries. This cable enables fast data transfer and can be connected to MCIO-enabled devices. They also design computer cables like USB C cables, active optical cables, HDMI cables, ethernet cables, and others. Their products are camera link cables, USB 3.0 vision cables, trigger cables, machinery equipment - M12 cable, M8 cable, servo power cable, industrial Ethernet cable, D-sub cable, and many more.

The firm has been providing high-quality services and products since 2004. Their popular product is the PCIe (Peripheral Component Interconnect Express) cable. It has multiple features like data transfer, low latency, hot plug support, multiple lane configurations, high speed, etc. These cables allow fast data transfer and are an important part of modern computing systems. It is a high-speed interface cable created for connecting various components including, graphics cards, storage devices, and other expansion cards, or other PCIe-enabled devices. They manufacture different types of PCIe cables - PCIe 3.0, PCIe 4.0, PCIe 5.0, PCIe x1, PCIe x4, PCIe x8, and PCIe x16. The products from Himatch Electronics are developed to meet the highest standards of quality and are widely used in critical applications across diverse industries.

Along with manufacturing cables, Himatch Electronics also develops connectors - M8 connector, M12 connector, M23 connector, SDR connector, Mdr connector, and others. The company has collaborated with leading-edge brands like TCL, Huawei, Flex, Amphenol, and others to ensure the highest quality services. For over 20 years, they have been providing professional and reliable solutions to clients across China and beyond. They handle everything from design & development to prototype to production. Their team is highly skilled and professional with years of experience in the industry. Also, Himatch Electronics only uses superior-quality raw materials and advanced technology to ensure the optimum performance of its cables and connectors.

About Himatch Electronics

Himatch Electronics is a reliable and reputable connector and [PCIe cable manufacturer](#) in China. The company specializes in the development, design, and manufacturing of various types of cables mainly - PCIe and MCIO. Their research and production team constantly enhance product quality and track market dynamics, and customer reviews.
