

Ring.cr Launches eSim.cr: Affordable Data Connectivity for Foreign Tourists and Costa Ricans Traveling Abroad

San Jose, Costa Rica Sep 21, 2024 ([Issuewire.com](https://www.issuewire.com)) - [Ring.cr](https://ring.cr), a leading telecommunications provider in Costa Rica, is excited to announce the launch of [eSim.cr](https://esim.cr), a cutting-edge eSIM solution designed to meet the growing demand for affordable, flexible, and reliable data connectivity for both foreign tourists visiting Costa Rica and Costa Ricans traveling abroad.

With the rise in international travel and the growing need for easy-to-access, cost-effective mobile data solutions, eSim.cr offers a revolutionary way for users to stay connected in over **150 countries** worldwide. The product allows travelers to enjoy seamless connectivity without the hassle of traditional SIM cards, offering instant activation and affordable pricing.

Key Benefits of eSim.cr:

- Global Coverage:** Available in over 150 countries, eSim.cr ensures users can stay connected no matter where they travel.
- Affordable Data Plans:** The data-only eSIM for Costa Rica is competitively priced, offering rates comparable to local prepaid SIM cards. This makes eSim.cr not only an ideal choice for tourists but also

a cost-effective option for locals looking for flexible data solutions.

•**Simple Activation:** With no physical SIM card required, users can activate their eSIM with just a few clicks, making it perfect for travelers who want a hassle-free, instant solution.

•**No Hidden Fees:** Transparent pricing with no surprises ensures travelers can focus on enjoying their trips without worrying about high roaming costs or unexpected charges.

Meeting the Needs of Tourists and Locals Alike

Tourists visiting Costa Rica often face the challenge of finding affordable mobile data solutions. With eSim.cr, they now have an option that provides local pricing with global convenience. Additionally, for Costa Ricans traveling abroad, eSim.cr offers competitive rates in international destinations, eliminating the need for expensive roaming plans.

“We are thrilled to launch eSim.cr and bring a simple, affordable, and flexible data solution to both tourists and Costa Ricans. In a country dominated by three major carriers, eSim.cr offers a fresh alternative for locals who need reliable and affordable data, while ensuring tourists can stay connected during their travels,” said Jorge Guntanis, President of Ring.cr.

How It Works

Users can purchase and activate [eSim.cr](https://www.esim.cr) directly from the website, selecting a plan based on their data needs and travel destination. The eSIM is downloaded instantly onto compatible devices, providing immediate access to data services without the need for a physical SIM card.

About Ring.cr

Ring.cr is a Costa Rican telecommunications operator committed to delivering innovative and reliable solutions for mobile connectivity. With the launch of eSim.cr, Ring.cr is setting a new standard for affordable global data services for both travelers and locals alike.
