

Cinstar unveils CH Series Direct View LED Video Wall Panels

Shenzhen, Guangdong Oct 4, 2024 ([IssueWire.com](https://www.issuewire.com)) - [Cinstar Electronics](#) is excited to announce the launch of its **CH Series Direct View LED Video Wall Panels**, a highly customizable and versatile solution for any project requirements. The **CH Series** has been designed to optimize various installation methods, including wall mounting, right-angle setups, all-in-one LED walls, suspension, or floor-standing configurations.

Tailored Solutions for All Applications

One product can seamlessly meet all your application needs with this cutting-edge technology.

COB LED technology (Chip on Board) is at the fore of this invention. This next-generation or new-age solution exceeds customary **SMD (Surface-Mounted Device) LED** technology. As the latest growth in the **Direct View LED category**, **COB LED** technology delivers higher durability, adequate image quality, and enhanced resistance to environmental factors, making it the favored alternative for forthcoming projects.

Key Features of Cinstar CH Series Direct View LED Video Wall Panels:

- **Customizable Panel Sizes:** Tailored to meet the specific needs of every project, ensuring

optimal installation.

- **Multiple Installation Options:** Wall mounting, right-angle setups, suspension, floor-standing, and more.
- **COB LED Technology:** Advanced over traditional SMD LEDs, offering enhanced reliability, brightness uniformity, and higher durability.
- **All-In-One Solution:** Versatile enough for various applications, from commercial advertising to corporate events and entertainment venues.

The [Cinstar CH Series](#) sets a new standard for the **Direct View LED** market as industries increasingly turn to more advanced display solutions. With COB LED technology leading the way, this series is poised to be the trendsetter in the years to come, offering customers a future-proof investment for their display projects.

For more information about the **Cinstar CH Series** and to explore how it can meet your project requirements, please [contact us](#).

Enhance the visual experience with Cinstar's CH series direct-view LEDs.

About the Author: Founded in 2012, [Cinstar Electronics](#) is a Chinese LED display manufacturer dedicated to designing and providing high-quality LED products and competitive solutions for various applications. Our team are industry veterans with at least 5 years of experience and have managed thousands of LED projects from rental events to commercial installations. Our products have been exported to over 40 countries and used in high-profile installations and events worldwide.

Cinstar makes no effort to insist on the business principle of “Honesty, Integrity, and Responsibility” and is committed to being a trusted LED display manufacturer and integrated service provider. Cinstar has highly comprehensive product lines that cover a wide range of applications like commercial advertisement, the entertainment industry, corporate events, award ceremonies, conferences & meeting and monitor rooms, etc.

All our LED products are CE, UL, ETL, and FCC certified and compatible with European and American markets.
