Chandler, Arizona Oct 23, 2024 ([Issuewire.com](https://www.issuewire.com)) - *In our view, this recognition of Cytellix as a Cool Vendor in the 2024 Gartner Cool Vendors in CPS Security validates our innovative platform and customer value from AI-powered predictive threat response to our real-time reporting. The patented platform leverages our unique Intellectual Property by ingesting telemetry from multiple risk and threat sources then identifies the cyber risk and cyber threats in a single pane of glass.*

October 23, 2014 - Cytellix Corporation, the only platform fully integrating Governance Risk and Compliance (GRC) and Extended Detection Response (XDR) using patented Artificial Intelligence (AI), today announced it has been named in the 2024 Gartner report titled Cool Vendors in CPS Security. We believe being mentioned in this coveted report solidifies Cytellix's reputation as a game-changer in the cybersecurity industry, particularly for organizations with limited resources and high-security needs.

Cytellix built its transformative, Cytellix Cyber Watch Platform (CCWP®) to disrupt the GRC, MDR (Managed Detection and Response), and XDR markets by merging risk and threat management into a single, fully integrated, 24x7x365 platform, purpose-built for organizations without the budgets or manpower to manage comprehensive risk and threat solutions.

Cytellix being named a "Cool Vendor validates our belief that effective security monitoring must include risk validation for true situational awareness," said Brian Berger, President of Cytellix. "Our CCWP®

delivers risk and threat management more efficiently than disparate solutions, offering complete visibility at an affordable cost. We designed the Cytellix Cyber Watch Platform (CCWP®) to provide real-time awareness, transparency, detailed reporting, and actionable solutions for organizations with limited staff and budgets. We've found that all types of organizations—including SMBs, SLED, Enterprise, Critical Infrastructure, and Federal customers— have benefited with a significant reduction in overhead costs and security events, leveraging our fully integrated Risk and Threat solution."

Cytellix has been recognized by Gartner over the last 12-months with nine additional reports for our Cytellix Platform (CCWP®). Cytellix has a unique approach to addressing cybersecurity and cyber compliance sensitive customers, especially with DoD Supply Chains, Higher Education, Utilities, Telecom, Manufacturing, Financial Services, Federal and Healthcare segments. By providing a comprehensive, turnkey solution that works seamlessly across IT, Cloud, and CPS (Cyber-Physical Systems) environments. CCWP® offers organizations dynamic visibility across their entire organization, subsidiaries, supply chains, and commands, from a single, easy-to-use dashboard

"From our view, our inclusion in this Gartner report is a testament to the hard work and innovation of our team," added Howard Lin, Chief Security Architect." As we continue to evolve our platform, we remain committed to helping organizations maximize the value of their Risk and Security investments by providing the CCWP® for truly transformative use cases."

According to the 2024 Gartner Cool Vendors in CPS Security Report, "This year's Cool Vendors in CPS security are stretching the market in some important dimensions, including reaching new stakeholders, modernizing pricing, easing deployments, supporting CPS mobility enhancing visibility and linking ecosystems in an interconnected world"
