

Digivision.AI: Comprehensive Digital Transformation Solutions

DigiVision.AI revolutionizes visual data analysis with advanced AI-ML solutions for digital transformation, helping organizations optimize processes and strengthen security.

Mumbai, Maharashtra Oct 16, 2024 ([Issuewire.com](https://www.issuewire.com)) - [X-Biz TechVentures Private Limited](#) introduces DigiVision.AI revolutionizes visual data analysis with advanced AI-ML solutions for digital transformation, helping organizations optimize processes and strengthen security.

[DigiVision.AI](#)

DigiVision.AI currently captures approximately 39-40% of the total volume within the Indian BFSI sector. With over 3 billion documents processed and automated through the DigiVision framework, our esteemed and largest client base has realized a savings of 9.6 million man-days and ₹15.3 billion in resource costs. Additionally, our solution has identified 1.2 million fraud cases, safeguarding client assets valued at ₹1.1 trillion.

The Intelligent Digital Eye for the Future of Visual Data

Unlock the potential of **DigiVision.AI** is an advanced computer vision and data capture solution designed to transform document and video analysis. Leveraging **cutting-edge algorithms, natural language processing (NLP), machine learning (ML), and artificial intelligence (AI)**, DigiVision.AI extracts valuable insights from images and videos, enhancing both precision and operational efficiency.

With our proprietary blend of specialized **AI-ML and computer vision** technologies, we deliver highly accurate outputs that drive impactful business results beyond just technology.

Discover the DigiVision.AI Advantage

Explore our suite of 25+ AI-powered products engineered to streamline visual data analysis and digital transformation.

Key Solutions:

[AI-Driven OCR & Document Processing](#)

- **Advanced OCR & Table OCR**

Convert unstructured content into organized, accessible data with unmatched efficiency. Digitally transform document workflows for improved accuracy and speed.

- **Generative AI**

Generative AI is revolutionizing the Banking, Financial Services, and Insurance (BFSI) sector by enhancing customer experiences and streamlining operations.

In banking, it helps create personalized financial products, **analyzes customer data**, and automates tasks like chat support and document generation. In insurance, generative AI improves risk assessment through **predictive modeling**, allowing for tailored policies and **faster underwriting**.

For financial services, it boosts fraud detection and compliance by identifying unusual patterns and generating alerts. Overall, **generative AI empowers BFSI organizations** to innovate quickly, enhance efficiency, and provide more personalized services. It can be worked offline too.

Packaged Solutions for Maximum Efficiency:

- **iMagica Document Management Digi Merger, Digi Splitter, Digi Conversion, Digi Compression**

Simplify document management with tools for merging, splitting, converting, and compressing

files seamlessly across formats.

- **KYC Suite: Accelerating Onboarding and Enhancing Security (TrueCheck AI)** Identity & Financial Transaction Security
Powered by a **robust fraud prevention framework**, TrueCheck AI offers unlimited usage at a fixed cost. Utilize AI-driven tamper detection and fraud prevention to safeguard identity and financial transactions. The **KYC Suite** offers a **comprehensive solution** designed for faster customer onboarding, encompassing E-KYC, C-KYC, and O-KYC processes. By leveraging cutting-edge technologies such as **iMagica** and **X-Biz-OCR**, organizations can streamline their verification procedures.
- **DigiDoc Translator**
Instantly translate and maintain the original layout of any document format into over **60+** languages, including both **Indian and foreign languages**.
- **Video KYC Verification: Self-Assisted and Agent-Based** AI-Powered Video KYC for Secure, Seamless Onboarding and Compliance
Our **Video KYC** solution provides quick and secure customer identity verification using AI-powered video (**V-CIP**). You can choose between **self-assisted** or **agent-based** options to complete tasks like claim processing and account setup in just minutes.
- [Automated Underwriting](#) (**KYC, Medical, Financial**)
Automated underwriting is transforming the landscape of **KYC (Know Your Customer), medical, and financial** services by streamlining processes and enhancing efficiency. Overall, automated underwriting in these sectors **drives innovation, improves compliance, and enhances the overall customer journey**, enabling businesses to respond **more effectively to market demands**.
- **X-Biz BPM**
A low-code platform for dynamic workflow building, document management, and process automation.
- [Redaction & PII Masking](#)
Secure sensitive data with advanced redaction, including Aadhaar and PAN masking, to ensure privacy and regulatory compliance.

Advanced vector AI & Machine Learning Capabilities:

- **DigiFace AI:** This powerful engine provides advanced face detection, matching, and analysis capabilities, enabling ultra-personalized experiences for users. It enhances security and customization across various applications.
- **DigiSignature AI:** This customized AI solution offers highly accurate signature detection and verification, ensuring the integrity of documents and enhancing security in transactions.
- **DigiAudio AI:** This enterprise solution focuses on audio analytics, offering features like speech-to-text and text-to-speech capabilities using custom models. It enhances communication and data processing for organizations, enabling more efficient workflows and insights.
- **DigiTamper AI:** This advanced tamper detection system, driven by AI and machine learning, effectively prevents unauthorized alterations, ensuring the integrity and security of sensitive information.

- **DigiVideo AI:** This enterprise solution leverages video analytics to provide features such as liveliness detection, compression, conversion, splitting, transcription, video auditing, and PAM auditing. It streamlines video management and enhances data insights for organizations.

Data Security & Fraud Detection:

- **Fraud Detection & Prevention**
Mitigate risk with AI-powered fraud detection protocols designed to safeguard financial and personal data.
- **PII Masking & Redaction**
Ensure compliance with privacy regulations by masking sensitive information such as Aadhaar, PAN, and other personal identifiers.

Enterprise API Solutions & Online Services:

- **Pin code, MCA, IFSC, & CoWIN Services**
Integrate official government services such as pin code verification, company validation, IFSC code checks, and CoWIN certificate downloads seamlessly into your operations.
- **Paperless Services**
Streamline verification processes with digital solutions for KYC, banking, voter, GST, and employee verifications.

Why DigiVision.AI?

- **Enhanced Security:** Prevent fraud and unauthorized access with advanced AI-powered tamper detection, identity verification, and transaction monitoring.
- **Operational Efficiency:** streamline workflows, optimize document processing, and enhance compliance with automated solutions.
- **Cutting-edge vector AI:** Leverage the latest advancements in AI, machine learning, and computer vision to gain deeper insights and drive better decision-making.

Transform your business with DigiVision.AI—where technology meets precision and security.
