

Fjord Foundry surpasses \$1 Billion in raised capital

Lull in the Crypto markets? Fjord Foundry surpassing \$1 Billion USD raised on the platform says otherwise.

New York City, New York Oct 12, 2024 ([Issuewire.com](https://www.issuewire.com)) - Fjord Foundry surpasses \$1 billion USD raised

Fjord Foundry sprints through a major milestone despite the fear in the crypto space and projects pushing back launch dates, raising over \$1 billion USD from crypto projects launching on the platform.

Being permissionless and offering exclusively curated deals to its more than one hundred thousand community members, recent sales on the platform include Rage Trade which raised \$6 million in only 15 minutes and Pear Protocol doing \$2 million in under an hour. The Fjord team believes that the next milestone is within the horizon.

Roadmap ahead

There are other key community and protocol driven initiatives that are close to completion, such as staking of \$FJO tokens and a partnership between Fjord Foundry and HoneyPot Finance. The partnership will bring Fjord Foundry deeper into Berachain's ecosystem. Berachain is currently one of the most awaited launches within the cryptocurrency space, which achieved unicorn status earlier this year.

Team and community

Hemmi, COO of Fjord Foundry, stated after crossing the \$1B mark, *"While market downturns can see a slowdown in sales, the projects that have a determined team, community coupled with a brilliant product design; usually do well no matter the market conditions."* He also welcomes projects that are confident in these areas to go against the grain and list on Fjord Foundry's launchpad.

Token 2049

The team just finished this year's Token 2049 in Singapore building relationships and furthering their plans. To keep up to date with what the team is doing and sales launches on Fjord Foundry, subscribe to their socials.

About Fjord Foundry:

Fjord is a community-focused platform that specializes in connecting innovative projects with engaged backers. Built upon the principles of fairness and transparency, we offer a variety of token sale methods, including Fixed-Price Sales and our most popular and well-renowned method known as Liquidity Bootstrapping Pools (LBPs).

Fjord's mission is to democratize access to early-stage opportunities for our community of backers while providing projects the means to bootstrap liquidity in a seamless and straightforward manner.

For both project teams and individual backers, we provide an all-in-one environment geared towards early-stage ideas. Teams can focus on what truly matters—building out their vision and generating liquidity for decentralized exchange trading. While backers can explore a selection of early-stage opportunities that resonate with their passions and beliefs.

Fjord serves at the inflection point where projects and supporters engage, collaborate, and grow together.
