

Katto Launches in Tricity – Offering 24/7 Rides, Transparent Pricing, and Safety Features

Chandigarh, India Oct 23, 2024 ([Issuewire.com](https://www.issuewire.com)) - Katto, the latest entrant into the cab services market, will formally debut in Tricity (Chandigarh, Panchkula, and Mohali) in October 2024. The company guarantees 24-hour local transportation, fair pricing, and reliable safety measures that meet client convenience and safety criteria.

A New Era in Cab Services

Katto hopes to respond to the expanding market need for reliable, affordable, and safe transportation modes in the Tricity region. But in a market that's depended on notoriously unreliable pricing and availability, Katto is chipping in with a promise of customer rewards. The company has been strategically positioned to offer a variety of vehicle options, including Mini, SUV, and Sedan cabs suitable for varied budgets and preferences.

"We work with what Tricity commuters need and want to provide something better, more transparent, and safer for those on the go." "There is something for everyone, whether you need a quick ride across town or a comfortable drive for longer distances," said Katto's spokesperson.

24/7 availability as and when you require it, plus transparent pricing.

Another important tenet of Katto's service is its perpetual 24-hour availability. Unlike many of its competitors, who experience peak hour surges or can't book a ride during late hours, Katto guarantees that no matter when you want to book a ride, the fare won't come as a surprise. There is no guesswork with transparent pricing—you can know the upfront charges before booking. Passengers can arrange trips using a simple app, select the type of vehicle they want, and follow their cabs in real-time as they arrive.

Safety is at the forefront.

Katto is a safety company; all vehicles have GPS monitoring, emergency subscriptions, and extensive driver background checks. They are devised to allow passengers to feel safe during their ride. Katto's drivers also undergo intensive training programs to cover customer services and road safety to offer its customers an exceptional ride experience. Given its reliability during late-night trips, Katto is a great bet for families, solo travellers, and especially women.

For New Users, take advantage of Exclusive Offers.

The first time users use it, they will be entitled to exclusive discounts and promotions on the Katto launch. Obviously, registering on the Katto app and downloading it will let passengers get exciting offers over their first few rides, making the first few rides even less expensive. Through this initiative, we try to make users feel the unique opportunities Katto brings, from price transparency to safety.

[Katto: Future of Tricity Commuting](#)

Katto will stand out to drivers due to its focus on transparent pricing, 24/7 availability, and the highest safety features in the Tricity transportation industry. Katto intends to reinvent the passenger experience,

whether it's late-night travel, daily commutes, or long-distance travel, by doubling down on existing Ola Ubers and InDrive while maintaining its promise of a clean, privacy-conscious client experience.
