

Mohamed Djelmami-Hani, MD: A Trusted Cardiac Electrophysiologist at Aurora Medical Center Grafton

Bringing Expertise and Compassionate Care to the Community

New York City, New York Oct 21, 2024 ([IssueWire.com](https://www.issuewire.com)) - Dr. Mohamed Djelmami-Hani, a renowned cardiologist specializing in interventional cardiac electrophysiology, is a driving force in the treatment of complex arrhythmias and the management of intracardiac devices. With an exceptional academic and clinical career, Dr. Hani holds a position as a Clinical Adjunct Professor with the University of Wisconsin School of Medicine in Madison, WI. His contributions to the field extend beyond patient care—he is an accomplished author with numerous book chapters, over 50 published abstracts and papers, and a visionary inventor with groundbreaking contributions to the treatment of atrial fibrillation (AFib).

Dr. Hani's pioneering spirit is evident through his development of a novel intracardiac mapping technique and algorithm, revolutionizing the way AFib sources are visualized during ablation procedures, significantly improving patient outcomes. In addition to this innovation, he was a key member of the team that developed the transformative technique of converting 2D fluoroscopy into 3D cardiac maps, advancing precision in cardiac rhythm management procedures.

Known for his mastery of cutting-edge cardiac rhythm techniques, Dr. Hani's expertise spans a broad array of the most complex electrophysiological procedures. His ability to simplify and teach intricate concepts has made him a revered mentor, not only among the fellows, residents, and medical students he trains but also by his staff and patients. His teaching talent has earned him invitations to speak at numerous international cardiology and electrophysiology conferences, where he shares his insights and cutting-edge research.

Dr. Hani's passion for education is further demonstrated through his creation and direction of "EP Prime," a conference series designed to explain electrophysiology advancements to physicians and nurses. His commitment to medical education and patient care is matched only by his innovation in healthcare technology. As the founder and president of a company that developed an enterprise system to streamline healthcare communication, Dr. Hani continues to push the boundaries of medical innovation, making healthcare safer, more efficient, and cost-effective.

Outside of his medical career, Dr. Hani is a dedicated martial artist, holding a black belt in Karate. His discipline and focus in martial arts mirror the precision and dedication he brings to the medical field.

Dr. Mohamed Djelmami-Hani is not only a leader in the field of electrophysiology but also a visionary who continuously pushes the boundaries of what's possible in patient care and medical technology. Wisconsin is fortunate to have a physician of such caliber serving the community, teaching the next generation, and advancing the future of cardiac care.
