

Newtimes Hair Unveils Revolutionary Hair System for Men: The Game-Changing Thin Skin Base with Bleached Knots!

Los Angeles, California Oct 7, 2024 ([Issuewire.com](https://www.issuewire.com)) - [Newtimes Hair](#), a leading [hair system manufacturer](#), has announced the launch of its latest innovation: the **Thin Skin Hair System with Bleached Single Split Knots**. This groundbreaking product redefines the standards of realism and durability for [men's hair systems](#), setting a new benchmark in the industry.

The new system addresses a key challenge that has plagued traditional poly skin bases—hair retention. Typically, most salon owners and toupee wearers prefer [thin skin hair systems](#) for their natural, knotless effect that creates a scalp-like appearance. When applied, these hairpieces blend seamlessly, mimicking natural hair growth without visible knots.

However, many skin systems tend to shed over time due to ventilation methods like V-loops and injection techniques. Without secure knots, the hair is prone to being pulled out after a period of wear. Newtimes Hair addresses this issue with its **Bleached Single-Split Knots on Poly**. This innovative method creates strong, nearly invisible knots, ensuring a natural hairline that blends seamlessly with the wearer's scalp without worrying about shedding. This advancement reinforces Newtimes Hair's position as a **leading hair system manufacturer** in the industry.

"We're excited to introduce this level of sophistication and innovation to the market," said Niki Mei, general manager of Newtimes Hair. "We aim to deliver a hair system that provides both durability and an incredibly lifelike look—and we believe we've achieved that."

The advanced knotting technique is adaptable to various skin base thicknesses, starting from a delicate 0.03mm, making it suitable for different preferences and wearers. In addition, clients can choose between front-only bleaching or full-head customization, allowing for a more personalized experience depending on their styling needs. This flexibility ensures that every wearer can find a solution that suits their aesthetic requirements perfectly.

With a reputation for quality and innovation, Newtimes Hair has long been regarded as a trusted leader in the hair replacement industry. The company operates in over **100 countries** and partners with **2,000 salons and studios**, providing a broad selection of lace, mono, and skin-based systems and full human hair wigs and extensions. Each product is crafted from **100% premium human hair** to guarantee a natural look and feel, giving clients unparalleled, realistic, and comfortable results.

Since its release, the **Thin Skin Hair System with Bleached Knots** has received widespread acclaim from industry professionals and end-users alike. Its ability to offer a flawless hairline, combined with its improved longevity and wearability, has made it a popular choice among hair studios and vendors looking to provide top-tier solutions to their clients.

Newtimes Hair's production capabilities and inventory—housing over **80,000 hair systems** at any given time—ensure they can meet the growing global demand. They also offer **OEM (Original Equipment Manufacturing) and ODM (Original Design Manufacturing) services**, enabling salons and hair vendors to launch their own private-label hair systems with ease. This support extends to **dropshipping services** and **custom packaging solutions**, helping businesses of all sizes start, expand, and thrive in a competitive market.
