

Onyx Coating Lunches its Next Generation Paint Protection Films: Vunyx® Innoguard PPF

New generation film Vunyx® Innoguard to safeguard vehicles' painted surfaces.

Great Neck, New York Nov 1, 2024 ([Issuewire.com](https://www.issuewire.com)) - [Onyx Coating](https://www.onyxcoating.com) USA has introduced its newest paint protection film, Vunyx® Innoguard, to the market. This revolutionary product represents the most advanced PPF ever developed by Onyx Coating, designed to help vehicle owners protect their investments from harsh environmental conditions.

Building upon the foundation of Onyx Coating's premium line of paint protection films, [Vunyx® Innoguard](#) and [Innoguard Plus](#) deliver significant performance improvements. Featuring cutting-edge self-healing technology, this sophisticated product goes beyond traditional paint protection by incorporating our innovative stain-resistant technology. The result is a pristine, mirror-like finish that minimizes the need for extensive maintenance.

"As an innovative team that consistently works collaboratively to produce top-quality and cutting-edge automotive care products, we are excited to announce our newest [PPF](#) solution, Vunyx® Innoguard, the next generation of automotive surface protection," says Mr. Ahmed Madi, Sales Director of Onyx Coating. "These films embody our commitment to providing car owners with unmatched protection and convenience. With Vunyx® Films, drivers can spend less time maintaining their vehicles and more time enjoying the freedom of the open road."

The new **Vunyx® Innoguard** PPF is designed to withstand the toughest environmental conditions. With this film, Onyx Coating has responded to vehicle owners' demand for a highly durable, virtually invisible, non-yellowing, glossy finish. **Vunyx® Innoguard** features advanced self-healing and hydrophobic properties, ensuring long-lasting protection while preserving the vehicle's pristine appearance.

Installers of Vunyx® Innoguard PPF can enjoy numerous benefits that enhance their ability to deliver a superior installation experience to their customers.

Easy Application: The film's design ensures a smooth application process, even for first-time users.

Enhanced UV Protection: Protect the vehicle's paint from harsh sunlight by blocking 85% of UV rays, preventing fading and preserving its vibrant color.

Non-Yellowing Properties: Vunyx® Innoguard Film is formulated with advanced UV inhibitors and anti-aging agents to resist yellowing and discoloration caused by sun exposure and environmental factors. This ensures the film retains its clarity and transparency, maintaining the vehicle's original paint color and finish.

Cost Savings: Long-term protection reduces the need for frequent repairs and lowers maintenance costs over the vehicle's lifetime.

Peace of Mind: With Vunyx® Innoguard Film, customers can rest assured that their investment is well-protected against most external threats.

Interested in becoming an Installer

To become an approved installer of Onyx Coating's Vunyx Paint Protection Films, applicants must either demonstrate substantial experience and knowledge in the field or complete specialized training. Candidates with proven expertise may qualify for a training exemption; however, all applicants are required to pass a certification evaluation to verify their proficiency and understanding of ONYX COATING products and application techniques. For further information, please reach out to Onyx Coating's GCC regional distributor, [Al Rabiya Auto Accessories](#).
