

Resolute announces the opening of the industry's first dedicated UK based R&D facility for DTF & DTS

Sheffield, South Yorkshire Oct 3, 2024 ([Issuewire.com](https://www.issuewire.com)) - [Resolute](#) has announced the opening of the industry's first dedicated UK-based research and development facility for DTF & DTS.

Following the move to new purpose-built premises in March 2024, [Resolute](#) has acquired more space to allow Global R&D Director Colin Marsh to continue to innovate with the Resolute team and its partners.

Colin says, we have big plans for this new facility. This industry is growing at a phenomenal rate and [Resolute](#) has always been at the forefront of DTF. The new R&D premises will enable us to bring together the key industry players alongside our OEM partners to continue to push the possibilities and bring manufacturing back into the UK and USA for as many products as possible. One of our latest projects, due to be revealed Q1 2025 has pushed the R&D property acquisition forward as it requires a considerable amount of floor space. As we concentrate heavily on streamlining the DTF process with faster speeds and automation, we need a facility that allows our team to work behind closed doors.

The new facility will open ahead of 2025 and Resolute's 15th birthday celebrations.
