

# Super Proposal unveils a new Pricing Table feature to revolutionize proposal creation.

Pricing table update PR

**Union City, California Nov 7, 2024 (IssueWire.com) - Super Proposal**, is the best tool for creating professional proposals in any industry. The automation function completely reduces manual mistakes. They are excited to announce the launch of its latest feature—the Pricing Table. This new addition is designed to streamline the process of creating accurate and visually appealing proposals by automating pricing calculations, discounts, and tax applications. Although, when you are handling a small project or large scale proposals, the pricing table makes sure the calculations are quick, easy, and error-free.

The [Pricing Table in Super Proposal](#) allows users to effortlessly input product names, quantities, and other details, with the system automatically calculating the total cost of the project. You can also add the section of discounts and tax percentages, it will remove the requirement for manual calculations. This feature is designed to save time and reduce the risk of human error, calculation is the supreme step where you can't make mistakes. But, with that you can totally make the proposal process much smoother and more accurate.

## Key Benefits for Proposal Creation

- **Automation:** The Pricing Table automatically calculates totals, taxes, and discounts, ensuring

accuracy and saving users from tedious manual work.

- **Customization:** Users can easily adjust columns, rows, and formats to fit the specific needs of their project, ensuring that proposals are tailored to the client's requirements.
- **Real-Time Updates:** Any changes made to the pricing or quantity are reflected instantly, making it easy to adjust proposals on the fly.
- **Integration:** The Pricing Table integrates seamlessly with other Super Proposal features, creating a smooth, all-in-one solution for proposal generation.

## Enhancing The Proposal WorkFlow

The Super Proposal is designed to make proposal creation faster and easier by removing the need for separate tools to manage pricing. The Pricing Table automates complex calculations, ensuring that professionals can focus on delivering exceptional project outcomes without getting bogged down by the numbers. Whether you are working with AV, IT, construction, or any other industry that requires detailed proposals. And with the new pricing table helps you to complete the work more efficiently.

“Our goal with the Pricing Table is to simplify the proposal process for professionals across all industries,” said Sahil Dhingra, Co-Founder of Super Proposal. “With this new feature, users can generate proposals that are accurate, professional, and ready to send out in a fraction of the time.”

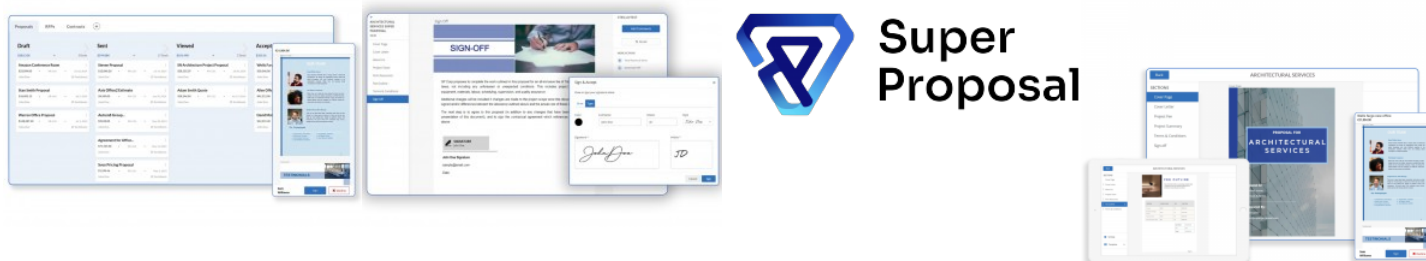

## About Super Proposal
