

Techonomy 24: Leading with Intelligence to Ignite NYC on November 18-19th

A confluence of business and technology luminaries convenes to explore critical issues at the intersection of artificial intelligence, biotechnology, robotics, automation, cybersecurity, blockchain, and more.

New York City, New York Nov 14, 2024 ([Issuewire.com](https://www.issuewire.com)) - Techonomy is returning to New York November 18-19 for the thirteenth edition of its flagship event with **Techonomy 24: Leading with Intelligence**. Taking place at the brand-new **Civic Hall** on 14th Street — a state-of-the-art venue crafted to inspire innovation and collaboration — Techonomy 24 will bring together the sharpest minds in technology and business to explore how intelligence is transforming industries worldwide.

Civic Hall, Cyrranus, HTC VIVE, HTEC Group, and Rivian are proud to sponsor this year's event, which promises a day and a half of visionary insights, intimate networking, and groundbreaking discussions. More than 200 executives, entrepreneurs, decision-makers, and policymakers are set to convene for this meeting of the minds.

"Our 'Leading with Intelligence' theme underscores the need for a broader definition of intelligence," says Worth CEO Josh Kampel. "While Artificial Intelligence will be a key part of the conversation, we will explore the nuances of Emotional Intelligence and how leaders today must navigate the delicate balance of innovative technology and ethical responsibility to foster a more equitable future."

"The AI revolution happened very slowly and then all at once," according to Dan Costa, Chief Content Officer at Worth Media Group and Techonomy. "CEOs, policymakers, and even the technologists

building these tools are grappling with what it all means—that conversation continues at Techonomy 24.”
