

The Blueprint to a More Purposeful Way to Live and Lead

11th Book by “Essential Wisdom for Every Generation” Author Shares Practical Insights to Spark Meaningful Growth in Leaders of All Ages and Stages.

Atlanta, Georgia Oct 3, 2024 ([IssueWire.com](https://www.IssueWire.com)) - Do more with less is the mantra for today's global economy. When the goal post keeps moving and budgets continue to shrink, the life of a leader can feel similar to that of a hamster wheel. The first items typically cut from any schedule gasping for time are those critical one-on-ones with direct reports and even more critical time spent in self reflection, but this is a costly mistake. Randy Hain's newest book, *Becoming a More Thoughtful Leader*, challenges the

status quo of a “just get through the day” mindset and urges leaders to slow down in the midst of the workplace whirlwind. This counter-cultural philosophy is the foundation of the author’s 30+ year business career and the place from which he draws the best practices and insights found within each chapter.

Randy Hain is founder and president of Serviam Partners and co-founder of leadership consulting firm The Leadership Foundry. Inspired by countless executive coaching conversations with leaders around the world, coupled with his own successful career, *Becoming a More Thoughtful Leader* taps into Randy’s unique reflective style to offer actionable insights on a host of relevant leadership topics. “My hope,” Hain shares, “is that readers of this book will not only become better leaders, but also better and more thoughtful humans.” Here’s what others are saying about *Becoming a More Thoughtful Leader*:

This book serves as an invaluable guide for leaders seeking to make a lasting impact on their teams and organizations. -**Juan Perez**, Chief Information Officer for Salesforce

As author Andreas Widmer states in the book’s forward, you don’t have to sacrifice KPIs, customer satisfaction or social impact measurements to become a more thoughtful leader. In fact, you’ll notice a renewed sense of vigor as your team feels more connected, engaged and cared for. This subtle challenge to be more reflective about your own growth as a leader and more thoughtful about investing in your colleagues at work transcends short-term measurements for long-term impact. Embrace the challenge to invest in yourself and others.
