

ThunderMax Engine Control Module Is Now Available At West End Motorsports

New Bern, North Carolina Oct 31, 2024 ([Issuewire.com](https://www.issuewire.com)) - [West End Motorsports](#) proudly announces the addition of the ThunderMax ECM with Auto-Tune and Rider Programming, specifically designed for 2024 Harley-Davidson Touring models, to its selection of aftermarket motorcycle parts. This innovative performance module represents a significant technological advance within the motorcycle industry by providing riders with unmatched control and efficiency.

Advanced auto-tuning capabilities

The ThunderMax ECM is engineered to enhance the riding experience by offering advanced auto-tuning capabilities for optimal performance. Riders can expect to experience a smoother power delivery, improved throttle response, and enhanced fuel efficiency, all optimized based on their unique riding style and environment.

Customization and control for riders

One of the standout features of the ThunderMax ECM is its rider programming interface. This allows users to make real-time adjustments to various bike settings to fine-tune performance. Never before

have riders had this amount of control over the settings of their bikes.

Seamless integration and easy installation

Compatible with the 2024 Harley-Davidson Touring models (Helix, non-VVT), the ThunderMax ECM is able to seamlessly integrate with the existing engine management system, making installation easy. No permanent modifications or extended downtime is needed. The ThunderMax ECM's plug-and-play installation process means more time on the road.

The ThunderMax ECM is made in the USA and is a must-have accessory for any Harley-Davidson Touring riders looking to bring out the best in their bike's performance. For more information or to order yours from West End Motorsports, [visit the page here](#).
