

Unveiling iJOY Uranus Mate 40K with AI and Ice Control

Affton, Missouri Oct 20, 2024 ([Issuewire.com](https://www.issuewire.com)) - [iJOY Uranus Mate 40K](#) is the first of its kind to integrate artificial intelligence with adjustable nicotine and cooling levels. This advanced device aims to redefine user experience with high-tech enhancements and customizable vaping options.

This ijoy vape boasts an impressive array of features, starting with its substantial puff capacity of approximately [40000 puffs](#), making it one of the most enduring disposable vapes on the market today. It is powered by a rechargeable 1100mAh built-in battery and contains triple tanks pre-filled with 20ml of e-

liquid, ensuring prolonged usage without the need for frequent refilling.

iJOY Uranus Mate 40K is its dual-output mode, which delivers 28W and 8W, tailored to accommodate different vaping preferences. This device is operated through voice commands, recognizing prompts such as "Hey, iJOY" to activate various functions. These include nicotine control settings (NIC 30, NIC 40, NIC 50), and ice control levels (ICE 0 through ICE 3), allowing users to customize their vaping experience according to their cooling preference.

Furthermore, the vape's AI capabilities are a pioneering feature. The AI mode on the Uranus Mate 40K can automatically generate a personal vaping mode based on the user's behavior, optimizing the vaping experience to suit individual preferences seamlessly. Additionally, the large screen display of the device is divided into four sections, providing real-time monitoring of battery life, e-liquid capacity, ice level, and nicotine strength.

iJOY has also equipped the Uranus Mate 40K with both dual mesh coils at 0.4 ohms and a single mesh coil at 1.4 ohms, enhancing the flavor and vapor production while offering adjustable airflow to fine-tune the draw resistance. This one of [smart phone disposable vapes](#) supports mouth-to-lung (MTL) vaping, a style that mimics the inhalation method of smoking traditional cigarettes, appealing to smokers transitioning to vaping.

Despite its advanced technology, the ijoy disposable vape maintains user convenience with its draw-activated firing mechanism, eliminating the need for buttons and simplifying operation. It is also designed for charging with a Type-C port, although users need to supply their own cable.

As the vaping industry continues to evolve, iJOY's introduction of the Uranus Mate 40K represents a significant innovation, setting a new standard for what users can expect from disposable vaping devices. The integration of AI and customizable settings in a disposable format not only enhances user experience but also pushes the boundaries of what is technologically possible in vaping products.
