

Worksoft and EPI-USE Labs Partner to Redefine SAP Test Automation, Data Management, and Provisioning for QA

This industry-first solution combines automation, security, and compliance to support digital transformation. By uniting two industry leaders, the partnership helps businesses manage SAP testing complexities with ease, ensuring agility & resilience.

London, United Kingdom Oct 23, 2024 ([Issuewire.com](https://www.issuewire.com)) - In a move poised to reshape enterprise software testing, Worksoft, a global leader in end-to-end enterprise test automation, has formed a strategic partnership with EPI-USE Labs, a powerhouse in SAP test data management, provisioning and landscape optimization. This collaboration promises to redefine how businesses approach software quality assurance, driving a new standard in test automation, data management and provisioning for global enterprises.

This partnership, aimed at addressing the growing complexity of enterprise systems and the demand for continuous delivery, integrates Worksoft's advanced, end-to-end test automation solutions with EPI-USE Labs' industry-leading test data management capabilities. For organizations looking to scale automation efforts without compromising data integrity, this joint solution offers unparalleled efficiency and security.

Revolutionizing Test Automation and Data Integrity

As companies face growing demands for flawless, accelerated software delivery, the management of secure test data often presents a significant challenge. The Worksoft and EPI-USE Labs collaboration solves this problem by providing a comprehensive solution that automates business processes while ensuring secure and compliant data across systems.

"We are thrilled to partner with EPI-USE Labs to elevate the standards of enterprise software testing," said Matthew Schwartz, CEO of Worksoft. "Together, we empower SAP customers to automate testing with unmatched efficiency and data security, driving quicker, high-quality application releases that keep businesses competitive in today's fast-paced market."

Driving Business Value and Accelerating Digital Transformation

To refine the focus on SAP value and cost savings in the partnership between Worksoft and EPI-USE, here's a concentrated summary of the key points related to those aspects:

- **Cost Savings and Efficiency:** The collaboration between Worksoft and EPI-USE Labs offers an integrated solution that automates both SAP test automation and data management, cutting down on manual efforts. This reduces operational costs and enhances efficiency by streamlining the testing processes across complex SAP systems.
- **Better Risk Management:** The enhanced test data management ensures that test environments resemble real-world SAP production systems, which mitigates costly mistakes, reduces downtime, and optimizes resource usage.
- **Faster Software Releases:** Automating testing across SAP landscapes helps organizations accelerate their software delivery while maintaining data security and compliance, further contributing to cost savings by reducing the time and resources needed for manual testing

efforts.

The combined expertise of Worksoft and EPI-USE Labs is set to change how businesses deliver software, allowing them to handle complex testing with ease while protecting important business data.

An Industry-First Solution

As digital transformation continues to push enterprises towards faster delivery cycles, the ability to seamlessly integrate test automation with secure, compliant test data management will become mission critical. Worksoft and EPI-USE Labs are leading this charge, offering an industry-first solution that combines automation, data security, and compliance into a single, scalable offering.

The union of these two industry leaders stands to elevate the entire software quality assurance ecosystem, providing companies with the tools they need to remain agile, competitive, and resilient in an increasingly data-driven world.

"By providing solutions for lean secure test systems and data, EPI-USE Labs focuses on helping clients to manage change in their complex, highly integrated SAP landscapes. We are excited to be partnering with Worksoft, one of the leading SAP test automation companies, to deliver a holistic SAP test solution to support our clients as they adopt and deploy the SAP innovations of GROW, RISE, BTP and AI that will transform their businesses today." Stephen Owens, Managing Partner of EPI-USE Labs.
