

XTEN-AV Revolutionizes AV Proposal Creation with Customizable and Automated Pricing Tables

Empowering AV Designers and Installers with Dynamic Pricing Tools for Seamless Proposal Customization and Accuracy

Union City, California Oct 8, 2024 ([Issuewire.com](https://www.issuewire.com)) - **XTEN-AV**, the industry-leading platform for automating audiovisual system design, announces the launch of its latest feature—**customizable and automated pricing tables**. This new addition enables users to create structured, visually appealing pricing tables within their AV documents and proposals, streamlining the pricing process while ensuring accuracy and professionalism. Designed with AV designers and installers in mind, the pricing table feature enhances the proposal creation experience with advanced customization and built-in calculation functions.

Revolutionizing AV Proposals with Customizable Pricing Tables

With this feature, **XTEN-AV users can now fully customize pricing tables** to meet specific project needs, providing greater control over the structure and design of their proposals. Users can easily adjust the number of rows and columns, modify formatting options, and ensure the table fits the aesthetic and functional requirements of their audiovisual documentation. This flexibility gives AV professionals the power to deliver proposals that are not only detailed but also polished and client-ready.

The platform's **built-in calculation features** further enhance the functionality of these tables. Totals, taxes, discounts, and other financial details are calculated automatically based on the data entered, ensuring that pricing information is accurate and consistent. This reduces the risk of manual errors, increases efficiency, and helps AV professionals focus on delivering their services rather than being bogged down by administrative tasks.

Key Features and Benefits

- **Full Customization:**

XTEN-AV's pricing tables are fully customizable, allowing users to tailor them to the specific needs of each project. Columns and rows can be added or adjusted easily, while formatting options ensure that the tables align with the visual standards of the proposal.

- **Automated Calculations:**

Built-in calculation features automatically compute totals, taxes, and discounts, reducing the risk of human error and making the pricing process more efficient. Users can trust that their numbers are accurate, giving them peace of mind when presenting pricing to clients.

- **Professional and Visually Appealing:**

The tables are designed to enhance the overall look of the [AV proposal](#). Clean lines, clear formatting, and professional presentation help to instill confidence in potential clients, increasing the chances of closing deals.

- **Time-Saving Features:**

By automating calculations and simplifying the table creation process, XTEN-AV enables users to create complex, accurate pricing tables in a fraction of the time. This allows AV designers and installers to focus more on client communication and project execution.

A Game-Changer for the Audiovisual Industry

The introduction of the customizable pricing table feature is **set to make waves in the AV industry**. For audiovisual professionals, the ability to create accurate, clear, and visually engaging proposals in less time is a significant advantage. This feature helps to simplify the workflow for AV system designers and integrators, allowing them to deliver more efficient and client-friendly pricing breakdowns.

By incorporating advanced automation and customization options, XTEN-AV continues to support AV professionals in streamlining their proposal process, ultimately helping them to close deals faster and with greater confidence.

Quote from Leadership

Vib Singh, CEO of XTEN-AV, commented on the launch, stating:

“At XTEN-AV, we are committed to providing innovative tools that simplify and enhance the proposal process for AV professionals. The new customizable pricing tables are a perfect example of how we are making it easier for designers and installers to deliver proposals that are accurate, professional, and client-ready. This feature empowers our users to save time, reduce errors, and present pricing information with confidence.”
