

Zhejiang Environmental Protection Services Drive Green Trade Across Asia

Jakarta, Indonesia Oct 14, 2024 ([Issuewire.com](https://www.issuewire.com)) - The 2024 Zhejiang Service Trade Exhibition (Indonesia) took place successfully from September 18 to 20 at the Jakarta International Expo (JIE) Center in Indonesia.

As the global shift towards a green and low-carbon economy accelerates, the environmental protection industry is entering a phase of rapid development. An increasing number of countries are embracing green trade as a key driver for economic transformation. Represented by environmental technology products and services, green trade is playing a vital role in the advancement of international service trade and has emerged as one of the most promising industrial sectors.

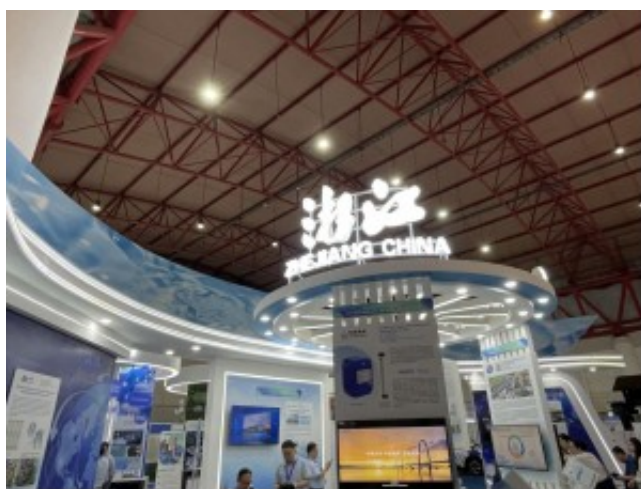

Zhejiang Province, home to numerous environmental protection enterprises, boasts a solid industrial foundation. The region is abundant in advanced technologies and high-end talent, with a dynamic green trade landscape and a steadily increasing export volume year on year. There are over 10,000 export enterprises, including many comprehensive firms specializing in environmental protection services.

Capitalizing on their industrial strengths and the advantages of green development, Zhejiang-based companies offer complete solutions and cutting-edge technologies in areas such as environmental assessment planning, monitoring and consulting, seawater desalination and remediation, and environmental engineering design and treatment. These companies demonstrate significant international market competitiveness, particularly within Asia, including countries like Indonesia, Vietnam, and Thailand.

A total of 11 environmental protection service enterprises from Zhejiang participated in this exhibition, showcasing products and services across various fields, including comprehensive environmental governance solutions, integrated seawater desalination technology, wastewater recycling systems, smart detection systems, smart water management, smart environmental protection, and digital industrial environmental protection services.

The exhibition included several presentations and interactive sessions. Over the three-day event, numerous buyers participated, creating a lively atmosphere for communication and achieving remarkable results.

Environmental protection service enterprises based in Zhejiang expressed a strong commitment to further expanding into the Southeast Asian market, with a particular focus on Indonesia. Key areas such as environmental water treatment, marine pollution management, and industrial solid waste treatment are anticipated to become new sectors abundant with business opportunities.
