About the Book:

Tomb of Empires invites readers into the ancient Middle East set in 90 BC, along the Silk Route, where complex characters—such as Chao the Han Chinese explorer, Zaim the Nabatean prince, and Apollonia, the Ptolemaic princess—navigate friendships, rivalries, and power struggles. Dr. Yusuf Jha, a Shari'a Specialist with the UAE Council for Fatwa, praised the book as a “captivating narrative that skillfully blends historical depth with timeless human themes... rivaling classics like *Dune* and *Lord of the Rings*.”
