

Dr. Ayah Megahed: Spearheading Interventional Radiology and Global Outreach

Combining Expertise in Interventional Radiology with Passion for Education and Healthcare Access

New York City, New York Nov 20, 2024 ([Issuewire.com](https://www.issuewire.com)) - Dr. Megahed, a Pediatric Interventional Radiology Fellow at Boston Children's Hospital is working hard to expand the field of Interventional Radiology, combining her passion for education and global health outreach. With her extensive background and dedication to patient care, she is hoping to impact both local and international medical

communities profoundly.

Originally from Cairo, Egypt, she earned her medical degree and completed her Radiology Residency at Ain Shams University, one of the leading medical institutions in the Middle East. Her training provided her with a solid foundation in Diagnostic and Interventional Radiology.

As an Assistant Lecturer of Radiology at Ain Shams University, Dr. Megahed was deeply committed to education and mentorship. She is passionate about sharing her knowledge and experiences with the next generation of radiologists, emphasizing the importance of combining technical expertise with compassionate patient care.

Dr. Megahed's interest in interventional radiology—a subspecialty that uses minimally invasive procedures guided by imaging technology—reflects her commitment to innovative patient care. Such interest inspired her to move across the Atlantic alone, on a journey of personal and professional growth. She completed a Radiology residency at Yale New Haven Health, Bridgeport Hospital, where she served as chief resident followed by an Interventional Radiology fellowship at the prestigious Dotter Interventional Institute, and now is receiving subspecialized training in Pediatric Interventional Radiology at Boston's Children's Hospital. By utilizing these techniques, she can help treat various conditions with less risk and quicker recovery times for her adult and pediatric patients. Her clinical work exemplifies her dedication to providing high-quality healthcare while exploring new methods to improve patient outcomes.

In addition to her clinical and educational responsibilities, she is involved in global outreach initiatives. She recognizes the disparities in healthcare access and aims to bridge these gaps through her work. She seeks to bring advanced Interventional Radiological care and education to underserved populations around the world.

Dr. Megahed's remarkable journey from Cairo to Boston exemplifies her dedication to the medical field and her vision for a healthier future. As she is finalizing the last chapter in her training, she remains focused on her goals of advancing Interventional Radiology and making a meaningful difference in global health.
