Harvel & Hunter Products — best landscape irrigation products -

• Rotors-

Rotors are essential components of any efficient irrigation system. They provide even water distribution over large areas, making them ideal for lawns, golf courses, and sports fields.

Get the Best Price Rotors Landscape Irrigation System. Harvel Hunter rotors are designed for durability and performance, ensuring reliable operation under various conditions. Their advanced features allow for precise water distribution control, helping maintain healthy and vibrant landscapes.

• MP Rotators-

The MP Rotator is a game-changer in the irrigation industry. Unlike traditional spray heads, the MP Rotator delivers multiple streams of water at a slow and steady rate, which improves water absorption and reduces runoff.

This innovative product is perfect for conserving water while ensuring thorough coverage. It's a favourite among landscapers and property owners for its efficiency and effectiveness. MP Rotator is the best tool to maximize the efficiency of your irrigation design.

• Nozzles-

Nozzles are critical for controlling the spray pattern and water flow in irrigation systems. Harvel Hunter offers a wide range of nozzles to suit different landscaping needs.

Hunter Irrigation Nozzles are made of high-quality plastic for long-lasting durability. It features a precision-engineered design for superior performance and provides uniform water distribution. Our Hunter spray nozzles cater to a spectrum of applications, from residential gardens to golf courses.

Whether you need a fixed spray pattern or a customizable option, Harvel Hunter has a nozzle to meet your requirements.

• Spray Bodies-

Spray bodies are the backbone of any irrigation system, housing the nozzles and providing the necessary pressure for effective water distribution.

Hunter Spray bodies are engineered to ensure long-lasting, reliable performance and advanced features that ensure optimal performance. They are designed for easy installation and maintenance.

• Controllers-

Controllers are the brains of an irrigation system, managing when and how much water is delivered to different zones.

Harvel Hunter controllers are equipped with state-of-the-art technology, allowing for precise scheduling and remote access. With features like weather-based adjustments and smartphone compatibility, these controllers make it easy to achieve efficient and customized irrigation schedules.

Hunter Controller is built to fit any landscape irrigation system. Hunter Irrigation Controller — Get the Best Price at Harvel.

• Valves-

Valves are essential for controlling the flow of water in an irrigation system. Harvel & Hunter offers a range of durable and reliable valves that are designed to handle various pressure and flow conditions. Their valves are known for their superior performance and ease of use, ensuring that water is delivered efficiently to where it is needed most.

Hunter has a full valve lineup for different irrigation system designs, but most valves have the same fundamental functionality.

Hunter Industry valves provide the foundation for a water-efficient and responsive irrigation system.
