

Introducing Keylabs 2.0: Revolutionizing ML Annotation with Smarter, Faster, and Easier Tools

Keylabs.ai announces the launch of Keylabs 2.0, an upgraded version of its annotation platform. Powered by Segment Anything Model v2 (SAM 2) and enriched with new features, Keylabs 2.0 makes annotation faster, smarter, and more efficient.

New York City, New York Nov 27, 2024 ([Issuewire.com](https://www.issuewire.com)) - After months of development and incorporating feedback from annotators and clients, Keylabs 2.0 introduces a host of enhancements. It boosts accuracy, streamlines workflows, and delivers an efficient user experience.

Key Features of Keylabs 2.0:

Smart ML-Powered Annotation with SAM 2

The integration of SAM 2 empowers users with advanced object segmentation tools. The model precisely detects and outlines objects with just a click, even in complex or overlapping scenarios.

- **Intuitive Interaction:** adjusting segmentation with simple prompts like points or boxes.
- **Unmatched Precision:** fast, accurate, and reliable results for projects of any scale.

Effortless Object Tracking in Videos

Annotation for video projects has never been easier.

- **Seamless Tracking:** objects can be selected, tracked automatically across frames, and adjusted as needed.

- **Quick Adjustments:** results fine-tuned with ease to maintain high-quality annotations.
- **Time Savings:** Manual work is significantly reduced, allowing teams to concentrate on higher-value tasks.

Enhanced Workflow for Ultimate Convenience

Keylabs 2.0 emphasizes usability and efficiency with features designed to simplify the annotation process:

- **Streamlined Interface:** a revamped toolbar places essential tools at the fingertips, making multi-frame operations smoother.
- **Efficient Reviews:** quickly assess annotation quality before submission.
- **User-Centric Design:** enhanced UX ensures advanced tools are accessible to all users, regardless of technical expertise.

Experience Keylabs 2.0 Today

Michael Seldin, CTO of Keylabs.ai, shared his vision for the platform: "Keylabs 2.0 is not just an upgrade — it's a leap forward in how we approach data annotation. By integrating the latest advancements in AI, such as SAM 2, we're helping teams to work smarter, not harder. Our goal has always been to remove the barriers between innovation and execution, and this release is a testament to that commitment."

About Keylabs.ai:

Keylabs.ai image and video annotation platform has been built by annotation experts to deliver high-performance data annotation and management features as well as unique operations management. Its tools have a track record of handling large datasets without compromising on efficiency or accuracy. Trusted by global technology leaders, Keylabs combines cutting-edge technology with user-focused design to deliver solutions to projects of any type and size.
