

PitPat Launches CEO Qualification Challenge: Race Against Global Runners for a \$1000 Grand Prize

Houston, Texas Nov 27, 2024 ([IssueWire.com](https://www.issuewire.com)) - [PitPat](#), the world's leading online competition platform, has successfully captured the attention of global running enthusiasts with its innovative virtual racing format and precise data tracking. Combining technology with fitness, PitPat has created a new community for both fitness and competitive sports. Whether you are a beginner or an experienced runner, PitPat offers a platform to challenge yourself and push your limits. Recently, PitPat launched the highly anticipated CEO Qualification Challenge, a race that not only tests physical endurance and mental willpower but also provides participants with the chance to explore their future potential.

The CEO Qualification Challenge will take place on November 26, with participants aiming to complete 6 miles within a 12-hour time limit. The race will begin at 10:00 AM EST, with participants able to queue up 30 minutes before the start. Registration will close 30 minutes prior to the race's conclusion. The fastest runners will receive different prize amounts based on their performance, with the top prize reaching up to \$1000. In addition, the top 10 finishers will receive generous bonuses of \$500, \$300, and \$100, respectively. However, this competition is not only about rewards—it is a qualifying event. Successful participants will have the chance to continue competing against PitPat's CEO for higher honors and opportunities.

PitPat founder Kevin Zhang shared that the CEO Qualification Challenge is not just a running event, but also an embodiment of PitPat's platform philosophy—challenging oneself and breaking boundaries. Through this event, PitPat hopes to inspire every runner to surpass their limits and pursue greater goals. At the same time, PitPat will continue to use innovative technology and its event platform to promote the popularity and development of running and fitness, helping each user achieve their health objectives. In the future, PitPat will delve deeper into combining virtual races with smart hardware, aiming to offer runners a more intelligent and personalized fitness experience.

Additionally, participants in this event can join the competition using treadmills from PitPat's partners, [DeerRun](#) and [SupeRun](#). These treadmills offer precise running data tracking and seamless integration with the PitPat platform, ensuring a better race experience. Both DeerRun and SupeRun treadmills are equipped with the latest smart technology, capable of real-time data uploads to ensure fairness and transparency in the competition. Runners will also receive real-time feedback during the race, helping them adjust their training status and improve their performance.

Sleek Design, Outstanding Performance

The DeerRun and SupeRun treadmills excel in structural design. Weighing under 80 pounds and equipped with bottom rollers, users can easily move the treadmills to any location. The treadmills feature a patented foldable design, which saves space when folded, making them perfect for home use. Additionally, assembly is quick and easy, taking less than three minutes to set up. The treadmills come with 100% safe components and a two-year warranty, providing peace of mind to users.

Powerful Performance

The DeerRun and SupeRun treadmills also stand out in terms of performance. Built with durable ABS+PC shell materials, these treadmills feature motors with 1.2-3.6 horsepower, reaching a maximum speed of 5400 RPM. The customizable power options cater to different user needs, with a pace range of 3.8-10 MPH, ensuring that every runner can enjoy a smooth, efficient running experience. The powerful motor system not only ensures the stability of the treadmill but also enhances its durability for long-term use, making it suitable for daily training and races.

Durable, Non-Slip Running Belt

The DeerRun and SupeRun treadmills come equipped with a five-layer non-slip running belt, combined with a patented three-layer structure, ensuring stability and safety during running. Whether for high-intensity training or daily use, the belt's abrasion resistance and pressure resistance are designed to withstand frequent use. Even with two hours of daily running, the belt will maintain excellent performance, with an expected lifespan of up to two years, making it ideal for any athlete looking to improve their running performance.

About PitPat

As the world's largest online competition platform, PitPat is dedicated to offering smarter, more personalized event experiences for runners. Through constant innovation and technology-driven solutions, PitPat provides users with a diverse range of virtual racing options and continues to promote the popularity of running while helping more people achieve their health and challenge goals. PitPat's vision is to combine smart hardware with virtual races, allowing runners worldwide to break boundaries and enjoy the joy and achievement that running brings.
