

RWB Group UK: Utility Mapping Innovation for Enhanced Safety and Efficiency

Watford, Hertfordshire Nov 26, 2024 ([Issuewire.com](https://www.issuewire.com)) - RWB Group UK is thrilled to announce the expansion of its [Utility Mapping services](#), reinforcing its dedication to precision, safety, and pioneering advancements in the infrastructure sector. As a frontrunner in infrastructure development, RWB Group UK acknowledges the critical importance of precise mapping in optimising project efficiency and upholding the highest safety standards.

Accurate utility mapping transcends being a mere procedural requisite; it is a foundational element for project success. RWB Group UK collaborates with a wide array of stakeholders, all of whom depend on the provision of accurate and reliable mapping data. This precision is vital for minimising disruptions, averting costly errors, and safeguarding financial investments. More crucially, it ensures the safety of on-site workers and maintains the integrity of the company's infrastructure.

Employing state-of-the-art technology, [RWB Group UK](#) integrates tools such as Geolantis.360 into its operational processes. This advanced solution captures comprehensive surface and subsurface data in

real time, equipping the teams with the insights needed to make well-informed decisions. By enhancing both safety and efficiency, these technologies are transforming the approach to new projects and the maintenance of existing infrastructure.

"We are committed to expanding our mapping capabilities," stated Ben Wyatt, Group Operations Director of RWB Group UK. "By adopting technologies that allow us to work more intelligently, we ensure that every project meets our rigorous standards for success and safety."

Exploring New Frontiers: RWB Group UK's Venture into the United States

Recently, Group Operation Directors, Ben Wyatt and George Wright embarked on a strategic journey to the United States. Their initial destination was RWB Group's U.S. operations center in Ontario, California, where they engaged in a productive meeting with NSA manager Pablo Realizan at [RWB Group US](#).

During their visit to California, Mr. Wyatt and Mr. Wright also stopped by the PelicanCorp office in Irvine. There, they met with Vice President Siddarth Munivelu to explore an exciting collaboration on Geolantis.360 utility mapping software. This cutting-edge software is set to transform the way their field engineers operate from the new Ontario, California, operations center and across the waters in the United Kingdom.

This innovative tool is poised to enhance operations, significantly boosting efficiency and precision in utility management. It signifies a remarkable advancement for RWB Infrastructure PLC Group as the company continues to remain at the forefront of infrastructure innovation.

With this initiative, RWB Group UK continues to spearhead advancements in utility mapping, demonstrating that precision and innovation are imperative for progress in today's fast-paced environment. As they look towards the future, their focus remains steadfast on developing solutions that protect their workforce and deliver exceptional results for their clients.
