

The Multichain Queen \$SHARBI..

The Multichain Queen welcomes you A Strong Community and Safe Investment Across Multiple Chains With over \$1 million rewarded to our holders in just a year, it's not too good to be true it's the real deal

Yonkers, New York Nov 26, 2024 ([Issuewire.com](https://www.issuewire.com)) - Welcome to Sharbi, known as the multichain queen of memes. It's a thriving ecosystem where holders have received over \$1 million in rewards. The community is strong and offers a safe investment across multiple chains. Sharbi is positioned as a significant player in the meme coin market, aiming for a multi-billion dollar valuation.

Since January 2023, holders have benefited from a Paid 2 Hold (P2H) structure, allowing them to earn money simply by holding the token. The Sharbi Dream Factory helps turn ideas into successful ventures, while a revenue share model enriches holders. The Hot Seat event offers weekly opportunities for crypto projects to showcase themselves, with high viewer engagement and potential cash prizes.

Sharbi operates on three chains: Solana, Ethereum, and Shibarium. Each provides unique growth opportunities, with advantages in liquidity, trading volume, and community engagement. Sharbi isn't just a memecoin; it's a movement backed by a loyal community.

The Boom Boom Capital (BBC) Whale Fund offers opportunities to earn passive rewards through quarterly distributions. Investments are democratically decided by the Sharbi DAO, ensuring security and transparency.

The Sharbi DAO, formed in November 2023 in Panama, is dedicated to decentralized governance where major holders influence decisions. Members holding a specific amount of tokens can join and participate in shaping the project's direction.

To engage with the community, followers can tune into weekly updates and live events. The focus is on maximizing the value for holders, making investments rewarding and beneficial. For the best experience, it is recommended to set up a compatible crypto wallet and partake in the growing Sharbi ecosystem.
